University of Engineering and Management

INSTITUTE OF ENGINEERING & MANAGEMENT, NEWTOWN

DEPARTMENT OF COMPUTER APPLICATIONS

DETAILED SYLLABUS BOOKLET – MCA-2023-25 BATCH

Syllabus Structure
1st Year 1st Semester

Course Code	Course Title	Total No. of Contact Hours				Total No. of Credits
		Lecture (L)	Tutorial (T)	Practical (P)	Total Hours	
1st Semester (Theory)						
MCACC101	Computer Organization and Architecture	3	1	0	4	3
MCACC102	Computer Programming with C	3	1	0	4	4
MCACC103	Data Structures with C	3	1	0	4	4
MCAMD101	Discrete Mathematical Structure	3	1	0	4	3
MCAAE101	Business English and Communication	3	1	0	4	3
MCA(GS)101	Mental Maths for Professionals - I	2	0	0	2	0.5
	Total of Theory				22	17.5
1st Semester (Practical)						
MCACC191	Micro Programming and Architecture Laboratory	0	0	3	3	3
MCACC192	C Programming Laboratory	0	0	3	3	3
MCACC193	Data Structures with C Laboratory	0	0	3	3	3
	Total of Practical				9	9
1st Semester (Sessional)						
MCASDP181	Competitive Aptitude Training - I	2	0	0	2	0.5
MAR	Mandatory Additional Requirements	0	0	0	0	0
IFC	Industry and Foreign Certification	0	0	0	0	0
MOOCS	Massive Open Online Courses	0	0	0	0	0
	Total of Sessional				2	0.5
	Total of Semester				33	27

Syllabus Structure
1st Year 2nd Semester

Course Code	Course Title	Total No. of Contact Hours				Total No. of Credits
		Lecture (L)	Tutorial (T)	Practical (P)	Total Hours	
2nd Semester (Theory)						
MCACC201	Database Management System	3	1	0	4	4
MCACC202	Object-Oriented Programming with Java	3	1	0	4	4
MCACC203	Data Communication & Computer Networks	3	1	0	4	4
MCACC204	Advanced-Data Structures with C	3	1	0	4	4
MCAESP201	Mental Maths For Professionals - II	2	0	0	2	0.5
Total of Theory					18	16.5
2nd Semester (Practical)						
MCACC291	Database Management System Laboratory	0	0	3	3	3
MCACC292	Object-Oriented Programming with Java Laboratory	0	0	3	3	3
MCACC294	Advanced-Data Structures with C Laboratory	0	0	3	3	3
Total of Practical					9	9
2nd Semester (Sessional)						
IVC282	Economics, Finance and Entrepreneurship Skills - Intermediate	0	0	0	2	0
MCASDP281	Competitive Aptitude Training - II	2	0	0	2	0.5
IFC	Industry and Foreign Certification	0	0	0	0	0
MAR	Mandatory Additional Requirements	0	0	0	0	0
MOOCs	Massive Open Online Course	0	0	0	0	0
Total of Sessional					2	0.5
Total of Semester					29	26

Syllabus Structure
2nd Year 1st Semester

Course Code	Course Title	Total No. of Contact Hours				Total No. of Credits
		Lecture (L)	Tutorial (T)	Practical (P)	Total Hours	
3rd Semester (Theory)						
MCA301	Operating Systems and Systems Software	3	1	0	4	4
MCA302	Software Engineering & TQM	3	1	0	4	4
MCA303	Data Science & Data Analytics	3	1	0	4	4
MCA304	Statistics and Numerical Techniques	3	1	0	4	3
MCAESP301	General Studies & Current Affairs-III	2	0	0	2	0.5
Total of Theory					18	15.5
3rd Semester (Practical)						
MCA391	Operating Systems Laboratory (Unix)	0	0	2	2	3
MCA392	Software Project Management Laboratory	0	0	2	2	3
MCA393	Data Science & Data Analytics Laboratory (PYTHON)	0	0	2	2	3
Total of Practical					6	9
3rd Semester (Sessional)						
MCA381	Industrial Training	0	0	0	0	2
MCA382	Minor Project	0	0	0	6	6
MCA374	Environment & Ecology	2	0	0	2	2
MCA383	Seminar	0	0	0	0	1
MCASDP381	Competitive Aptitude Training - III	2	0	0	2	0.5
IFC	Industry and Foreign Certification	0	0	0	0	0
MAR	Mandatory Additional Requirements	0	0	0	0	0
MOOCS	Massive Open Online Courses	0	0	0	0	0
Total of Sessional					10	11.5
Total of Semester					34	36

Syllabus Structure
2nd Year 2nd Semester

Course Code	Course Title	Total No. of Contact Hours				Total No. of Credits
		Lecture (L)	Tutorial (T)	Practical (P)	Total Hours	
4th Semester (Theory)						
MCA401 A/B/C/D	Elective - I	3	1	0	4	3
MCA402 A/B/C	Elective - II	3	1	0	4	3
MCA403	Values and Ethics	2	0	0	2	1
MCA405	Management & Accounting	2	0	0	2	2
MCA(GS)401	General Studies & Current Affairs - IV	2	0	0	2	0.5
	Total of Theory				14	9.5
4th Semester (Practical)						
MCA491	Major Project	0	0	10	10	15
	Total of Practical				10	15
4th Semester (Sessional)						
MCA(GS)481	Competitive Aptitude Training - IV	2	0	0	2	0.5
IFC	Industry and Foreign Certification	0	0	0	0	0
MAR	Mandatory Additional Requirements	0	0	0	0	0
MOOCS	Massive Open Online Courses	0	0	0	0	0
	Total of Sessional				2	2.5
	Total of Semester				31	27

Elective No.	Course Code	Topic	Elective No.	Course Code	Topic
I	MCA401A	Distributed Database Management	II	MCA402A	Compiler Design
	MCA401B	Image Processing		MCA402B	Mobile Computing
	MCA401C	Parallel Programming		MCA402C	Embedded Systems
	MCA401D	Cloud Computing			

University of Engineering and Management

Institute of Engineering & Management, New Town Campus

University of Engineering & Management, Jaipur

1st Semester Syllabus for MCA Admission Batch 2023

University of Engineering and Management
Institute of Engineering & Management, New Town Campus
University of Engineering & Management, Jaipur
Syllabus for MCA Admission Batch 2023, 1st Semester

Subject Name: Computer Organisation and Architecture　　　　　　**Credit: 4**

Subject Code: MCACC101　　　　　　　　　　　　　　　**Lecture Hours: 40**

Name of the Course: Computer Organization and Architecture	
Course Code: MCACC101 & MCACC191	Semester: 1st
Duration: 40 Hrs.	Maximum Marks: 100
Teaching Scheme	Examination Scheme
Theory: 3	End Semester Exam: 100
Tutorial: 1	Continuous Assessment: 100
Practical: 2	Practical Sessional Internal continuous evaluation: 100
Credit: 4+2	Practical Sessional external examination: 100

Aim:	
Sl. No.	
1	To have a thorough understanding of the basic structure and operation of a digital computer.
2	To study the different communication methods with I/O devices and standard I/O interfaces.
3	To learn the architecture and assembly language programming of 8085 microprocessor.
Objective:	
Sl. No.	
1	Understanding Logic gates, flip flops and counter.
2	Clear Understanding of Computer Architecture.
3	Clear Understanding of Pipeline processing, RISC and CISC architectures.
4	Develop a base for advanced microprocessors.
Pre-Requisite:	
Sl. No.	
1.	Proficiency in basic Digital Electronics
Course Outcome:	
1.	Summarize the fundamental components of a basic computer system and its organization.
2.	Apply arithmetic and logical microoperations of binary number systems.
3.	Analyze control unit design and concept of pipelining.
4.	Classify memory hierarchy and examine numerical problems based on it.

CO2	3	2	2	2	-	-	1	-	-	2	-	2	-	-	-
CO3	2	2	3	3	-	-	1	-	-	2	-	2	-	-	-
CO4	3	2	3	2	-	-	-	-	-	2	-	2	-	-	-

Module number	Topic	Sub-topics	Mapping with Industry and International Academia	Lecture Hours	Corresponding Lab Assignment
1	**Structure of Computers and Computer Arithmetic**	Computer types, Functional units, Basic operational concepts, von Neumann Architecture, Bus Structures, Software, Performance, Multiprocessors and Multicomputer, Data representation, Fixed and Floating point, Error detection and correction codes Addition and Subtraction, Multiplication and Division algorithms, Floating-point Arithmetic Operations, Decimal arithmetic operations.	*International Academia:* https://web.stanford.edu/dept/registrar/bulletin_past/bulletin02-03/pdf/CompSci.pdf *AICTE-prescribed syllabus:* https://www.aicte-india.org/downloads/mcadegree.pdf *Industry Mapping:* The concepts delivered are in sync with the industry standards	4	1. Write a VHDL code to study and perform about logic gates. 2. Write a VHDL code to study and perform about De'Morgan's Theorem. Write a VHDL code to study and perform about NAND and NOR as a universal gates. 3. Write a VHDL code to design and implement circuit that converts binary code to gray code.

| 2 | **Basic Computer Organization and Design** | Instruction codes, Computer Registers, Computer Instructions and Instruction cycle. Timing and Control, Memory-Reference Instructions, Input-Output and interrupt. Central processing unit: Stack organization, Instruction Formats, Addressing Modes, Data Transfer and Manipulation, Complex Instruction Set Computer (CISC) Reduced Instruction Set Computer (RISC), CISC vs RISC | *International Academia:* https://web.stanford.edu/dept/registrar/bulletin_past/bulletin02-03/pdf/CompSci.pdf

 AICTE-prescribed syllabus: https://www.aicte-india.org/downloads/mcadegree.pdf

 Industry Mapping: The concepts delivered are in sync with the industry standards | 8 | 1. Write a VHDL code to study and perform about Half Adder and full Adder.
 2. Write a VHDL code to study and perform about Half substractor and full substractor.
 3. Write a VHDL code to design 3-bit odd/even parity generator and checker.
 4. Write a VHDL code to study and perform about R-S and D flip flop.
 5. Write a VHDL code to study and perform about J-K and T flip flop.
 6. Write a VHDL code to study and perform about Master slave JK flip flop. |
| 3 | **Register Transfer, Micro-Operations and Micro-Programmed Control** | Register Transfer Language, Register Transfer, Bus and Memory Transfers, Arithmetic Micro-Operations, Logic Micro-Operations, Shift Micro-Operations, Arithmetic logic shift unit, Control Memory, Address Sequencing, Micro-Program example, Design of Control Unit. | *International Academia:* https://web.stanford.edu/class/cs97si/03-data-structures.pdf

 AICTE-prescribed syllabus: https://www.aicte-india.org/downloads/mcadegree.pdf

 Industry Mapping: The concepts delivered are in sync with the industry standards | 8 | 1. Write a VHDL code to realize Boolean functions using multiplexer.
 2. Write a VHDL code to study and perform about Decoder and Demultiplexer.
 3. Write a VHDL code to study the use of decoder for BCD to seven segment LED display.
 4. Write a VHDL code to study universal shift register |

| 4 | **Memory System:** | Memory Hierarchy, Semiconductor Memories, RAM(Random Access Memory), Read Only Memory (ROM), Types of ROM, Cache Memory, Performance considerations, Virtual memory, Paging, Secondary Storage, RAID. | *International Academia:* https://web.stanford.edu/dept/registrar/bulletin_past/bulletin02-03/pdf/CompSci.pdf

AICTE-prescribed syllabus: https://www.aicte-india.org/downloads/mcadegree.pdf

Industry Mapping: The concepts delivered are in sync with the industry standards | 7 | |
| 5 | **Input-Output:** | I/O interface, Programmed IO, Memory Mapped IO, Interrupt Driven IO, DMA. | *International Academia:* https://web.stanford.edu/dept/registrar/bulletin_past/bulletin02-03/pdf/CompSci.pdf

AICTE-prescribed syllabus: https://www.aicte-india.org/downloads/mcadegree.pdf

Industry Mapping: The concepts delivered are in sync with the industry standards | 7 | |

| 6 | **MULTIPROCE SSORS** | Characteristics of multiprocessors, Interconnection structures, Inter Processor Arbitration, Interprocessor Communication and Synchronization, and Cache Coherence. | *International Academia:* https://web.stanford.edu/dept/registrar/bulletin_past/bulletin02-03/pdf/CompSci.pdf *AICTE-prescribed syllabus:* https://www.aicte-india.org/downloads/mcadegree.pdf *Industry Mapping:* The concepts delivered are in sync with the industry standards | 6 | |

Syllabus for MCA Admission Batch 2023, 1st Semester

Subject Name: Computer Programming with C   **Credit: 4**

Subject Code: MCACC102   **Lecture Hours: 40**

Name of the Course: Computer Programming with C	
Course Code: MCACC102 & MCACC192	**Semester: 1st**
Duration: 40 Hrs.	**Maximum Marks: 100**
Teaching Scheme	**Examination Scheme**
Theory: 3	End Semester Exam: 100
Tutorial: 1	Continuous Assessment: 100
Practical: 2	Practical Sessional Internal continuous evaluation: 100
Credit: 4+2	Practical Sessional external examination: 100

Aim:	
Sl. No.	
1	To gain Knowledge of Various aspects of algorithm development
2	To enhance Ability to identify qualities of a good solution
3	To implement learned algorithm design techniques and data structures to solve problems.

Objective:	
Sl. No.	
1	The fundamental design, analysis, and implementation of basic data structures.
2	Basic concepts in the specification and analysis of programs.
3	Principles for good program design, especially the uses of data abstraction.
4	Significance of algorithms in the computer field

Pre-Requisite:	
Sl. No.	
1.	Proficiency in one high level programming language

Course Outcome:	
1.	will be able to develop simple applications in C using basic constructs
2.	will be able to design and implement applications in C using Arrays and Strings
3.	will be able to design and implement applications in C using Functions and Pointers
4.	will be able to develop applications in C using Structures and Students will be able to design applications using sequential and random-access file processing.

Module number	Topic	Sub-topics	Mapping with Industry and International Academia	Lecture Hours	Corresponding Lab Assignment
1	**Basics of 'C' Programming**	Fundamentals of algorithms: Notion of algorithm, Notations used for assignment statements and basic control structures. Introduction to 'C': General structure of ' C' program, Header file, 'main ()' function. Fundamental constructs of 'C': Character set, tokens, keywords, Identifiers, Constants - number constants, character constants, string constants, Variables. Data types in	***International Academia:*** https://web.stanford.edu/class/cs97si/03-data-structures.pdf ***AICTE-prescribed syllabus:*** https://www.aicte-india.org/downloads/mcadegree.pdf ***Industry Mapping:*** The concepts delivered are in sync with the industry	6	

		'C': Declaring variables, data type conversion. Basic Input and Output functions: input and output statements using printf(), scanf() functions. Assignments and expressions: simple assignment statements, arithmetic operators, shift operators, bitwise operators, sizeof operator	standards		
2	**Control structures**	Conditional statements: Relational operators, logical operators, if statement, if-else statements, nested if-else statements, if-else ladder, switch statement. Looping statements: while loop, do-while loop, for loop. Branching Statements: goto statement, use of 'break' and 'continue' statements.	*International Academia:* https://web.stanford.edu/class/cs97si/03-data-structures.pdf *AICTE-prescribed syllabus:* https://www.aicte-india.org/downloads/mcadegree.pdf *Industry Mapping:* The concepts delivered are in sync with the industry standards	6	1. Write a C program to find sum and average of three numbers. 2. Write a C program to find the sum of individual digits of a given positive integer. 3. Write a C program to generate the first n terms of the Fibonacci sequence. metrices from the console, verifies if metrics multiplication is possible or not. Then multiplies the metrices and prints the 3rd metrics. 4. Write a C program to generate prime numbers between 1 to n. 5. Write a C program to Check whether given number is Armstrong Number or Not. 6. Write a C program to evaluate the algebraic expression (ax+b)/(ax-b). 7. Write a C program to check if the given number is perfect number? 8. Write a C program to check if given number is strong number? 9. Write a program to print your name without using any semicolon in the program. 10. Write a program to convert temperature in Celsius to Fahrenheit and vice-versa.

					11. Write a C program to check whether a number is Palindrome or not.
					12. Write a C program to find maximum between two numbers.
					13. Write a C program to find maximum between three numbers.
					14. Write a C program to check whether a number is negative, positive or zero.
					15. Write a C program to check whether a number is divisible by 5 and 11 or not within the range 100 to 500.
					16. Write a C program to check whether a number is even or odd.
					17. Write a C program to check whether a year is a leap year or not.
					18. Write a C program to check whether a character is alphabet or not.
					19. Write a C program to input any alphabet and check whether it is vowel or consonant.
					20. Write a C program to input any character and check whether it is an alphabet, digit or special character.
3	**Arrays and structure**	3.1 Characteristics of an array, One dimension and two dimensional arrays, concept of multi-dimensional arrays. 3.2 Array declaration and Initialization. 3.3 Operations on Arrays. 3.4 Character and String input/output and String related operations. 3.5 Introduction and Features of Structures, Declaration and Initialization of Structures, array of structures. 3.6 Type def, Enumerated Data Type	*International Academia:* https://web.stanford.edu/class/cs97si/03-data-structures.pdf *AICTE-prescribed syllabus:* https://www.aicte-india.org/downloads/mcadegree.pdf	8	1. Write a program to store marks for n number of student in an array and print their marks. 2. Write a program which stores the marks of subject Mathematics and English of n number of students in an array and then prints their individual total marks. 3. Write a program to insert an element in an array in a particular position. 4. Write a program to delete an element from a particular position of an array. 5. Write a program to convert a decimal number taken as input from user to corresponding binary number and store the result in an array.

					6. Write a program to input a binary number in an array and convert into corresponding decimal number.
			Industry Mapping: The concepts delivered are in sync with the industry standards		7. Write a program to find the smallest and the largest elements in an array.
					8. Write a program for deleting duplicate elements in an array.
					9. Write a program to search for a particular element in an array.
					10. Write a program to sort n elements (ascending order).
					11. Write a program to find second highest number from the array without using sorting.
					12. Write a program to perform addition and subtraction between two matrices.
					13. Write a program to transpose a matrix.
					14. Write a program to add the elements of each row and each column of a matrix.
					15. Write a program to perform the multiplication of two matrices.
					16. Write a program to check whether a matrix is identity matrix or not.
					17. Write a program to check whether a matrix is sparse matrix or not
					18. Write a C program to create a structure named company which has name, address, phone and no Of Employee as member variables. Read name of company, its address, phone and no Of Employee. Finally display these members" value.
					19. Define a structure "complex" (typedef) to read two complex numbers and perform addition, subtraction of these two complex numbers and display the result.
					20. Write a C program to read Roll No, Name,

					Address, and Age marks of 12 students in the BCT class and display the details from the function.
4	**Functions**	Concept and need of functions. Library functions: Math functions, String handling functions, other miscellaneous functions such as getchar(), putchar(), malloc(), calloc(). Writing User-defined functions - function definition, functions declaration, function call, scope of variables - local variables, global variables. Function parameters: Parameter passing- call by value & call by reference, function return values, function return types, declaring function return types, The 'return' statement. Recursive functions.	*International Academia:* https://web.stanford.edu/class/cs97si/03-data-structures.pdf *AICTE-prescribed syllabus:* https://www.aicte-india.org/downloads/mcadegree.pdf *Industry Mapping:* The concepts delivered are in sync with the industry standards	6	1. Write a C program to add, subtract, multiply and divide two integers using a user-defined type function with return type. 2. Write a C program to calculate sum of first 20 natural numbers using recursive function. 3. Write a C program to generate Fibonacci series using recursive function. 4. Write a C program to swap two integers using call by value and call by reference methods of passing arguments to a function. 5. Write a C program to find sum of digits of the number using Recursive Function. 6. Write a C program to read an integer number and print the reverse of that number using recursion. 7. Write a C program to find maximum and minimum between two numbers using functions. 8. Write a C program to check whether a number is even or odd using functions. 9. Write a C program to check whether a number is prime, Armstrong or perfect number using functions. 10. Write a C program to find power of any number using recursion.
5	Pointers	Introduction to Pointers: Definition, use of pointers, '*' and '&' operators, declaring, initializing, accessing pointers. Pointer arithmetic. Pointer to array.	*International Academia:* https://web.stanford.edu/class/cs97si/03-data-structures.pdf *AICTE-prescribed*	8	1. Write a C program to find the sum of all the elements of an array using pointers. 2. Write a C program to swap value of two variables using pointer. 3. Write a C program to add two numbers using pointers.

		Pointer and Text string. Function handling using pointers. Pointers to structure.	*syllabus:* https://www.aicte-india.org/downloads/mcadegree.pdf *Industry Mapping:* The concepts delivered are in sync with the industry standards		4. Write a C program to input and print array elements using pointer. 5. Write a C program to copy one array to another using pointer. 6. Write a C program to swap two arrays using pointers. 7. Write a C program to reverse an array using pointers. 8. Write a C program to search for an element in array using pointers. 9. Write a C program to add two 2 X 2 matrix using pointers. 10. Write a C program to multiply two 2 X 2 matrix using pointers. 11. Write a C program to find length of string using pointers. 12. Write a C program to copy one string to another using pointer. 13. Write a C program to concatenate two strings using pointers. 14. Write a C program to compare two strings using pointers. 15. Write a C program to find a substring from a given string using pointers.
6	File handling	Creation of the new file Opening an existing file Reading from the file Writing to the file Deleting the file	*International Academia:* https://web.stanford.edu/class/cs97si/03-data-structures.pdf *AICTE-prescribed syllabus:* https://www.aicte-india.org/downloads/mcadegree.pdf	6	1. Write a C Program to list all files and sub-directories in a directory. 2. Write a C Program to count number of lines in a file. 3. Write a C Program to print contents of file. 4. Write a C Program to copy contents of one file to another file. 5. Write a C Program to merge contents of two files into a third file. 6. Write a C program to delete a file.

		Industry Mapping: The concepts delivered are in sync with the industry standards

Syllabus for MCA Admission Batch 2023, 1st Semester

Subject Name: Data Structure with C   **Credit: 4**

Code: MCACC103   **Lecture Hours: 40 Subject**

Name of the Course: Data Structure with C	
Course Code: MCACC103 & MCACC193	Semester: 1st
Duration: 40 Hrs.	Maximum Marks: 100
Teaching Scheme	Examination Scheme
Theory: 3	End Semester Exam: 100
Tutorial: 1	Continuous Assessment: 100
Practical: 2	Practical Sessional Internal continuous evaluation: 100
Credit: 4+2	Practical Sessional external examination: 100

Aim:	
Sl. No.	
1	To gain Knowledge of Various aspects of algorithm development
2	To enhance Ability to identify qualities of a good solution
3	To implement learned algorithm design techniques and data structures to solve problems.
Objective:	
Sl. No.	
1	The fundamental design, analysis, and implementation of basic data structures.
2	Basic concepts in the specification and analysis of programs.
3	Principles for good program design, especially the uses of data abstraction.
4	Significance of algorithms in the computer field
Pre-Requisite:	
Sl. No.	
1.	Proficiency in one high level programming language
Course Outcome:	
1.	On completion of this course students are expected to learn various data structures, their usages, merits andlimitations.
2.	On completion of this course students are expected to design and analyze various algorithms.
3.	On completion of this course students are expected to do a comparative analysis among different data structuresand decide on the appropriate data structure to be used in a given scenario.
4.	On completion of this course students are expected to acquire adequate knowledge and skills to solve a real lifesoftware problem.

Industry Mapping: The concepts delivered are in sync with the industry standards | 8 | 21. Write a C program to print an array.
22. Write a C program to check whether a given string is Palindrome or not.
23. Write a C program to convert temperature from degree Centigrade to Fahrenheit.
24. Write a C program to sort an array.
25. Write a C program to print the largest and second largest element of the array.
26. Write a C program to display Fibonacci series.
27. Write a program that reads two 2D metrices from the console, verifies if metrics multiplication is possible or not. Then multiplies the metrices and prints the 3rd metrics.
28. Write a program that reads a 2D metrices and checks if the metrics is a symmetric metrics or not.
29. Write a C program to print reverse array
30. Write a C program to check the sum of all elements of an array
31. Write a C program to check duplicate number in an array.
32. Write a C program to read a 2D array (with most of the elements as 0s) and then represent the same array as Sparse Metrics.
33. Write a C program to pass an array to a function using Call by Value, update the array values in the function, print the array elements both in the function and in the calling function.
34. Write a C program to pass an array to a function using Call by Reference, update the array values in the function, print the array elements both in the function and in the calling function.
35. Write a program to display n number of |

					elements. Memory should be allocated dynamically using malloc( ).
					36. Write a program to display n number of elements. Memory should be allocated dynamically using calloc( ).
					37. Write a program to allocate memory using malloc( ) and then reallocate the previously allocated memory using realloc( ). Display the elements which have been taken after reallocation.
					38. Write a program to allocate memory using calloc( ) and then reallocate the previously allocated memory using realloc( ). Display the elements which have been taken after reallocation.
					39. Write a C program to search an element in an Array using dynamic memory allocation
3	**Linear Data Structure- Linked List**	Linked List-Introduction, Representation, Memory Allocation, Types- Singly, circular, doubly, doubly & circular, Operations on various linked lists-Count, Traverse/Display, Search, Insert, Delete	*International Academia:* https://web.stanford.edu/class/cs97si/03-data-structures.pdf *AICTE-prescribed syllabus:* https://makautexam.net/aicte_details/Syllabus/MCA/sem221.pdf *Industry Mapping:* The concepts delivered are in sync with the industry standards	8	21. Write a Menu driven C program to accomplish the following functionalities in single linked list. a) Create a single linked list. b) Display the elements of a single linked list. c) Insert a node at the beginning of a single linked list. d) Insert a node at the end of a single linked list. e) Insert a node before a given node of a single linked list. f) Insert a node after a given node of a single linked list. g) Delete a node from the beginning of a single linked list. h) Delete a node from the end of a single linked list. i) Delete a node after a given node of a single

					linked list. j) Delete the entire single linked list. 22. Write a Menu driven C program to accomplish the following functionalities in circular linked list. a) Create a circular linked list. b) Display the elements of a circular linked list. c) Insert a node at the beginning of a circular linked list. d) Insert a node at the end of a circular linked list. e) Delete a node from the beginning of a circular linked list. f) Delete a node from the end of a circular linked list. g) Delete a node after a given node of a circular linked list. h) Delete the entire circular linked list. 23. Write a Menu driven C program to accomplish the following functionalities in doubly linked list. a) Create a doubly linked list. b) Display the elements of a doubly linked list. c) Insert a node at the beginning of a doubly linked list. d) Insert a node at the end of a doubly linked list. e) Insert a node before a given node of a doubly linked list. f) Insert a node after a given node of a doubly linked list. g) Delete a node from the beginning of a doubly linked list.

					h) Delete a node from the end of a doubly linked list. i) Delete a node after a given node of a doubly linked list. j) Delete the entire doubly linked list. 24. Write a Menu driven C program to accomplish the following functionalities in circular doubly linked list. a) Create a circular doubly linked list. b) Display the elements of a circular doubly linked list. c) Insert a node at the beginning of a circular doubly linked list. d) Insert a node at the end of a circular doubly linked list. e) Delete a node from the beginning of a circular doubly linked list. f) Delete a node from the end of a circular doubly linked list. g) Delete a node after a given node of a circular doubly linked list. h) Delete the entire circular doubly linked list.
4	**Linear Data Structure-Stack**	Introduction, Stack Operations – Push, Pop, Peek, Representation of Stack (Array, Linked List), Application of Stack: Reversing a list, Parentheses checker, Conversion of an infix expression into a postfix expression, Evaluation of a postfix expression, Conversion of an infix expression into a prefix Expression, Evaluation of a	***International Academia:*** https://web.stanford.edu/class/cs97si/03-data-structures.pdf ***AICTE-prescribed syllabus:*** https://makautexam.net/aicte_details/Syllabus/MCA/sem221.pdf	7	11. Write a Menu driven C program to accomplish the following functionalities in Stack using an Array: a. Insert an element into the stack using an array (Push Operation). b. Delete an element from the stack using an array (Pop Operation). c. Return the value of the topmost element of the stack (without deleting it from the stack) using an array. d. Display the elements of a stack using an array.

		prefix expression, Recursion, Tower of Hanoi	*Industry Mapping:* The concepts delivered are in sync with the industry standards		12. Write a Menu driven C program to accomplish the following functionalities in Stack using Linked List: a. Insert an element into the stack using a Linked List (Push Operation). b. Delete an element from the stack using a Linked List (Pop Operation). c. Return the value of the topmost element of the stack (without deleting it from the stack) using a Linked List. d. Display the elements of the stack using a Linked List. 13. Write a program to convert an infix expression into its equivalent postfix notation. 14. Write a program to convert an infix expression into its equivalent prefix notation. 15. Write a program to evaluate a postfix expression. 16. Write a program to evaluate a prefix expression. 17. Write a program to print the Fibonacci series using recursion. 18. Write a program to solve the tower of Hanoi problem using recursion
5	**Linear Data Structure- Queue**	Introduction, Queue Operations – Enqueue, Dequeue, Peep, Representation of Queue (Array, Linked List), Types of Queues-Circular Queue, Deque, Priority Queue, Multiple Queue; Various operations (Enqueue, Dequeue, Peep) on the above mentioned queues-Both iterative & recursive implementation; Application of Queue	*International Academia:* https://web.stanford.edu/class/cs97si/03-data-structures.pdf *AICTE-prescribed syllabus:* https://makautexam.net/aicte_details/Syllabus/MCA/sem221.pdf *Industry Mapping:* The concepts delivered are in	7	1) Write a Menu driven C program to accomplish the following functionalities in Queue using an Array: a. Insert an element into the queue using an array (Enqueue Operation). b. Delete an element from the queue using an array (Dequeue Operation). c. Return the value of the FRONT element of the queue (without deleting it from the queue) using an array (Peep operation). d. Display the elements of a queue using an array. 2) Write a Menu driven C program to accomplish the following functionalities in Queue using

			sync with the industry standards		Linked List: a. Insert an element into the queue using a Linked List (Enqueue Operation). b. Delete an element from the queue using a Linked List (Dequeue Operation). c. Return the value of the FRONT element of the queue (without deleting it from the queue) using a Linked List (Peep operation). d. Display the elements of a queue using a Linked List. 3) Write a Menu driven C program to accomplish the following functionalities in Circular Queue using Array: a. Insert an element into the circular queue. b. Delete an element from the circular queue. c. Return the value of the FRONT element of the circular queue (without deleting it from the queue). d. Display the elements of a circular queue using the circular queue
6	**Searching & Sorting**	Searching- Types of Searching (Linear Search, Binary Search, Interpolation Search), Comparison among various Searching techniques Sorting-Types, Methods (Bubble Sort, Insertion Sort, Selection Sort, Quick Sort, Merge Sort), Technique, Explanation, Algorithm and Examples on various sorting methods, Comparison of various sorting algorithms in terms of time complexity (Average case, Worst case)	***International Academia:*** https://web.stanford.edu/class/cs97si/03-data-structures.pdf ***AICTE-prescribed syllabus:*** https://makautexam.net/aicte_details/Syllabus/MCA/sem221.pdf ***Industry Mapping:*** The concepts delivered are in sync with the industry standards	6	1) Write a C program to implement the concept of Bubble sort. 2) Write a C program to implement the concept of Selection sort. 3) Write a C program to implement the concept of Insertion sort. 4) Write a C program to implement the concept of Quick sort. 5) Write a C program to implement the concept of Merge sort. 6) Write a C program to show that Quick sort is better than Bubble sort. 7) Write a C program to show that merge sort is more effective than quick sort. 8) Write a C program to search an element in an array using linear search.

				9) Write a Cprogram to search an element in an array using binary search.
				10) Write a C program to search an element in an array using interpolation search.

Syllabus for MCA Admission Batch 2023, 1st Semester

Subject Name: Business English and Communication   **Credit: 3**

Subject Code: MCAAE101   **Lecture Hours: 33**

Name of the Course: Business English and Communication	
Course Code: MCAAE101	**Semester: 1**
Duration: 33	**Maximum Marks: 100**
Teaching Scheme	**Examination Scheme**
Theory: 3	End Semester Exam: 100
Tutorial: 1	Continuous Assessment: 100
Credit: 3	

Aim:	
Sl. No.	
1	Making the students industry-ready.
2	Making the students relevant in the contemporary society.
3	Making the students prepared to analyze and solve problems through listening, speaking, reading and writing skills.
Objective:	
Sl. No.	
1	To develop effective business writing and communication skills.
2	To enhance oral communication and presentation abilities among students.
3	To help students learn to prepare various business documents and technical reports.
4	To improve listening and reading comprehension.
Pre-Requisite:	
Sl. No.	
1.	Basic English Proficiency, Listening and Speaking Skills, Reading and Writing Skills, Academic and Social Contexts, and Familiarity with Corporate Ethics.
Course Outcome:	
1.	Achieve competence in grammar, syntax, and vocabulary fundamentals.
2.	Effectively communicate in academic and social contexts.
3.	Develop readiness for the industry and understand corporate ethics.
4.	Acquire basic proficiency in English encompassing reading, listening, comprehension, writing, and speaking skills.

2nd Semester Syllabus for MCA Admission Batch 2023

University of Engineering and Management

Institute of Engineering & Management, New Town Campus
University of Engineering & Management, Jaipur
Syllabus for MCA Admission Batch 2023, 2nd Semester

Subject Name: Database Management Systems   **Credit: 4**

Subject Code: MCA201   **Lecture Hours: 40**

Name of the Course: **Database Management Systems**	
Course Code: MCA201& MCACC291	**Semester: 2nd**
Duration: 40 Hrs.	**Maximum Marks: 100**
Teaching Scheme	**Examination Scheme**
Theory: 3	End Semester Exam: 70
Tutorial: 1	Continuous Assessment: 30
Practical: 2	Practical Sessional Internal continuous evaluation: 40
Credit: 4+2	Practical Sessional external examination: 60

Aim:	
1.	To gain Knowledge of technology used to manage data from a database
2.	To enhance Ability to identify Data into information, Information into knowledge and Knowledge to the action
3.	To gain Understanding of ORACLE software
Objective:	
1.	This course introduces the core principles and techniques required in the design and implementation of database systems.
2.	This course focus on relational database management systems, including database design theory: E-R modeling, data definition and manipulation languages, database security and administration.
3.	It covers essential DBMS concepts such as: Transaction Processing, Concurrency Control and Recovery
4.	It provides students with theoretical knowledge and practical skills in the use of databases and database management systems in information technology applications.
Pre-Requisite:	
1.	Concepts of computer programming (like programming in C --Files concepts).
Course Outcome:	
1.	Understand the basic concepts and the applications of database systems.
2.	Master the basics of SQL and construct queries using SQL.
3.	Understand the relational database design principles.
4.	Familiar with the basic issues of transaction processing and concurrency control.

Annexure – I (SQL based Lab – Assignments)

Assignment – 1:

Consider the following relational schema for the Office of the Controller of Examinations Application. Student (Rollno, Name, Dob, Gender, Doa, Bcode);
Implement a check constraint for Gender
Date of Admission
Branch (Bcode, Bname, Dno); Department (Dno, Dname);
Course (Ccode, Cname, Credits, Dno); Branch_Course (Bcode, Ccode, Semester);
Enrolls (Rollno, Ccode, Sess, Grade);
For Example,

SESS can take values 'APRIL 2013', 'NOV 2013'

Implement a check constraint for grade Value Set ('S', 'A', 'B', 'C', 'D', 'E', 'U');

Students are admitted to Branches and they are offered by Departments. A branch is offered by only one department.

Each branch has a set of Courses (Subjects). Each student must enroll during a semester. Courses are offered by Departments. A course is offered only by one department. If a student is unsuccessful in a course he/she must enroll for the course during next session. A student has successfully completed a course if the grade obtained by is from the list (A, B, C, D, and E).

A student is unsuccessful if he/she have grade 'U' in a course. Primary Keys are underlined.
Questions
These are questions for assignment 1
Question (A)
Develop a SQL query to list details of Departments that offer more than 3 branches.
Question (B)
Develop a SQL query to list the details of Departments that offer more than 6 courses.
 Question (C)
Develop a SQL query to list the details of courses that are common for more than 3 branches.
Question (D)
Develop a SQL query to list students who got 'S' in more than 2 courses during single enrollment.
Question (E)
Create a view that will keep track of the roll number, name and number of courses, a student has completed successfully.

Assignment – 2:

Consider the following relations for an Order Processing Database application in a Company.
Customer (Customerno varchar2 (5), Cname varchar2 (50)); Implement check constraints to check Customerno starts with 'C'.
Cust_Order (Orderno varchar2(5), Odate Date, Customerno references Customer, Ord_amt number(8)); Implement check constraints to check Orderno starts with 'O'.
Ord_amt is derived attribute (default value is 0);
Item (Itemno varchar2 (5), Item_name varchar2 (30), unit_price number (5)); Implement check constraint to check Itemno starts with 'I'.
Order_item (Orderno references Cust_order, Itemno references item, qty number (3));
Primary Key is underlined. Questions
These are questions for assignment 2. The solution is available after the last question.
Question (A)
Develop DDL to implement above schema enforcing primary key, check constraints and foreign key constraints.
Question (B)
Populate Database with rich data set.
Question (C)
Develop SQL query to list the details of customers who have placed more than 3 orders.
Question (D)

Develop a SQL query to list details of items whose price is less than the average price of all items in each order.
Question (E)
Develop a SQL query to list the orderno and number of items in each order.
Question (F)
Develop a SQL query to list the details of items that are present in 25% of the orders.
Question (G)
Develop an update statement to update the value of Ord_amt.
Question (H)
Create a view that keeps track of detail of each customer and number of Order placed.

Assignment – 3:

Q3: Consider the following relational schema
Staff (Staffno number (5), Name varchar2 (30), Dob Date, Gender Char (2), Doj Date, Designation varchar2 (30), Basic_pay number (6), Deptno varchar2 (5));
Gender must take value 'M' or 'F'.
Dept (Deptno varchar2 (5), Name varchar2 (30));
Skill (Skill_code varchar2 (5), Description varchar2 (30), Charge_Outrage number (3)); Staff_skill (Staffno number (5), Skill_code varchar2 (5));
Project (Projectno varchar2 (5), Pname varchar2 (5), Start_Date Date, End_Date Date, Project_Manager_Staffno number (5)); Project Number must start with 'P'.
Works (Staffno number (5), Projectno varchar2 (5), Date_Worked_On Date, Intime Timestamp, Outtime Timestamp);
Primary Key is underlined. Questions
These are questions for assignment 3. The solution is available after the last question.
Question (A)
Develop DDL to implement the above schema specifying appropriate data types for each attributes and enforcing primary key, check constraints and foreign key constraints.
Question (B)
Populate the database with rich data set.
Question (C)
Develop a SQL query to list the departmentno and number of staff in each department,
Question (D)
Develop a SQL query to list the details of staff who earn the AVG basic pay of all staff.
Question (E)

Develop a SQL query to list the details of staff who have more than 3 skills.
Question (F)
Develop a SQL query to list the details of staff who have skills with a charge outrate greater than 60 per hour.
Question (G)
Create a view that will keep track of the department number, department name, the number of employees in the department and total basic pay expenditure for the department.
Question (H)
Develop a SQL query to list the details of Depts which has more than 5 staff working in it.
Question (I)
Develop a SQL query to list the details of staff who have more than 3 skills.

Assignment – 4:

Consider the following relational schema for a banking database application. Customer (Cid, Cname);
Branch (Bcode, Bname);
Account (Ano, Atype, Balance, Cid, Bcode);
An account can be a saving account or a current account. Check Atype in 'S' or 'C'. A customer can have both types of accounts. Transaction (Tid, Ano, Tttype, Tdate, Tamount);
Ttype can be 'D' or 'W'.
D – Deposit, W – Withdrawal Primary Key is underlined. Questions
These are questions for assignment 4. The solution is available after the last question.
Question (A)
Develop DDL to implement the above schema specifying an appropriate data type for each attribute enforcing primary key, check constraints and foreign key constraints.
Question (B)
Populate the database with a rich data set.
Question (C)
Develop a SQL query to list the details of customers who have a saving account and a current account.
Question (D)
Develop a SQL query to list the details of branches and the number of accounts in each branch.
Question (E)
Develop a SQL query to list the details of branches where the number of accounts is less than the average number of accounts in all branches.
Question (F)

Develop a SQL query to list the details of customers who have performed three transaction on a day.

Question (G)

Create a view that will keep track of branch details and the number of accounts in each branch.

Assignment – 5 :

Let us consider the following database schema. As you can see in below figure, there are four tables (Existing Database)
- Projects, Employees, ProjectEmployees, and JobOrders. Recently, the Customers table has also been added to the database to store the customers' information. As you can see in the diagram below, the Customers table has not been designed in a proper way to support the normal forms, let's go ahead and fix it.
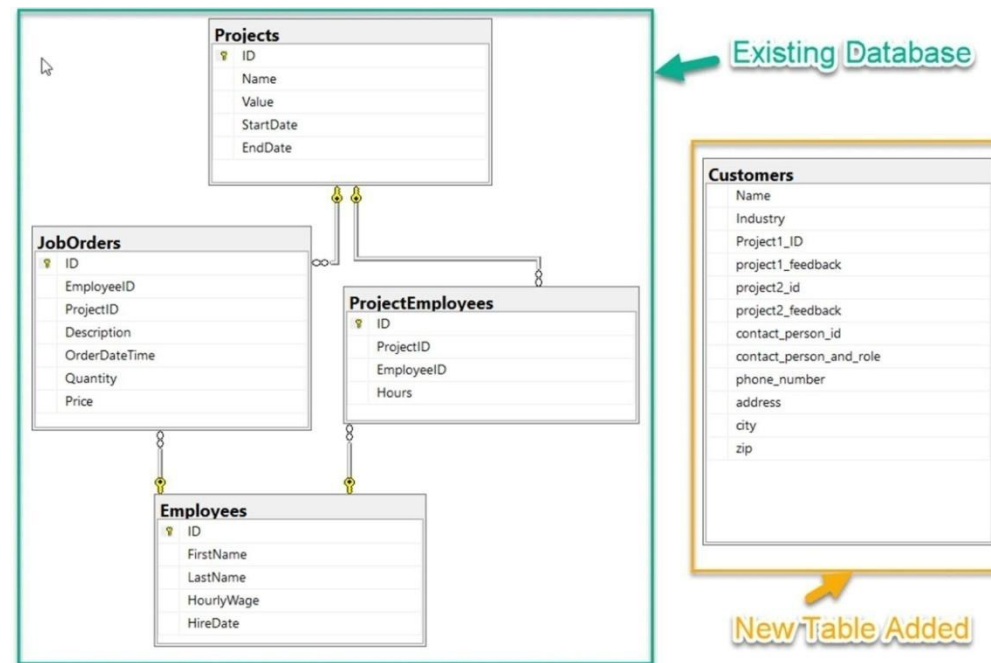

The Customers table in the diagram violates all the three rules of the first normal form.
We do not see any Primary Key in the table.
The data is not found in its most reduced form. For example, the column ContactPersonAndRole can be divided further into two individual columns
- ContactPerson and ContactPersonRole.
Also, we can see there are two repeating groups of columns in this table - (Project1_ID, Project1_FeedBack) and (Project2_ID, Project2_Feedback). We
need to get these removed from this table.

The diagram below shows dummy data stored in the Customers table.

Name	Industry	Project1_ID	Project1_Feedback	Project2_ID	Project2_Feedback	ContactPersonID	ContactPersonAndRole	PhoneNumber	Address	City	Zip
Zydus Cadilla	Pharma	2455	Amazing Work!			133	Dave, HoD	555-55-5555	1, Landing Street	York	23456
HDFC	Finance	9855	Nice job!	4924	Fantastic!	146	Mark, Ops Lead	222-22-2222	2, Times Square	London	86421
ICICI	Finance	3965	Well done.			122	Peter, Analyst	444-44-4444	3, Garden Street	Brussels	53864

a. Add a primary key to this table. For this, add a new column *ID* with datatype as *INT* and also assign it as an *Identity* column.
b. split the column ContactPersonAndRole into two individual columns. This can be done in two steps as follows:
   i.   Rename the original column from ContactPersonAndRole to ContactPerson.
   ii.   Add a new column for ContactPersonRole.
c. Finally, in order to satisfy the third rule of the First Normal Form, move the columns *Project1_ID*, *Project1_Feedback*, *Project2_ID*, and *Project2_Feedback* into a new table. This can be done by creating a new table *ProjectFeedbacks* and link it back with the *Customers* and the *Projects* table which remove the above-mentioned columns from the *Customers* table and create a new table *ProjectFeedbacks* with Foreign Key references to the *Customers* and *Projects* table.

The database schema after applying all the rules of the first normal form should be as below.

Projects
- 🔑 ID
- Name
- Value
- StartDate
- EndDate

ProjectFeedback
- 🔑 ID
- ProjectID
- CustomerID
- Feedback

JobOrders
- 🔑 ID
- EmployeeID
- ProjectID
- Description
- OrderDateTime
- Quantity
- Price

ProjectEmployees
- 🔑 ID
- ProjectID
- EmployeeID
- Hours

Customers
- Name
- Industry
- ContactPersonID
- ContactPerson
- PhoneNumber
- Address
- City
- Zip
- 🔑 ID
- ContactPersonRole

Employees
- 🔑 ID
- FirstName
- LastName
- HourlyWage
- HireDate

Altered Objects

if you see the database schema diagram above, you can see that the *ContactPerson*, *ContactPersonRole* and the *PhoneNumber* do not directly relate to the *ID* of the *Customers* table. That is because the primary key refers to a customer and not to any person or role or the phone number of the contact person.

1. Remove all these columns from the *Customers* table which do not relate to the primary key of the table directly.

2. Once, the columns are removed from the *Customers* table, now create a new table that'll store the data for the contact persons. Let us create a new table *ContactPersons* and relate it to the *Customers* table with a foreign key relation

Assignment – 6:

Implement B+ tree using any Programming Language.

List of Minor Projects Based on SQL

1. Blood Donation Management System
2. Cooking Recipe Website
3. Library Database Management System
4. Online Retail Database Software
5. Inventory Management System
6. Voice Commands Transport Enquiry System
7. Carbon-Emission Calculator
8. Railway Control System Database
9. Student Database Management
10. Hospital Management System
11. Payroll Management System
12. Grocery Store Sales

University of Engineering and Management

Institute of Engineering & Management, New Town Campus
University of Engineering & Management, Jaipur
Syllabus for MCA Admission Batch 2023, 2nd Semester

Subject Name: Object-Oriented Programming   **Credit: 4**

Subject Code: MCACC202   **Lecture Hours: 40**

Name of the Course: Object-Oriented Programming with Java & Object-Oriented Programming with Java Laboratory	
Course Code: MCACC202 and MCACC292	**Semester: 2nd**
Duration: 40 Hrs.	**Maximum Marks:** 100 + 100
Teaching Scheme	**Examination Scheme**
Theory: 3	End Semester Exam:70
Tutorial: 1	Continuous Assessment: 30
Practical: 2	Practical Sessional Internal continuous evaluation: 40
Credit: 4+2	Practical Sessional external examination: 60
AIM:	

Sl. No.	
1.	To gain the knowledge of basic object-oriented programming techniques.
2.	Learning the underlying concepts of Java Programming.
3.	Get industry ready with the coding skills.

Course Objectives:	
Sl. No.	
1.	To understand the basic concepts and fundamentals of platform independent object-oriented language.
2.	To demonstrate skills in writing programs using exception handling techniques and multithreading.
3.	To understand streams and efficient user interface design techniques.

Pre-Requisite:	
Sl. No.	
1.	Basics of programming language.
2.	Logic building skills.

Course Outcome:	
Sl. No.	
1.	Students should have an idea of how to work with different datatypes, operators, conditional statements and iterative statements in Java.
2.	Students should have an idea of how to work with strings, arrays, and different collection interfaces.
3.	Students should be able to use and design programs using their advanced data structures, I-O Streams, AWT, and GUI Programming using Applets and Swings.
4.	Students will learn to work with object-oriented programming constructs in Java using JDBC, JSP, Servlets and Databases and make small projects based on them.

Annexure – I (Programming based Lab – Assignments)

Assignment – 1: Basic Programming and Command Line Arguments

1. Write a Java Program to print your Name entered through the command line as an argument.
2. Write a Java program to convert Temperature from Fahrenheit to Celsius and vice versa.
3. Write a Java program to add two numbers.
4. Write a Java Program to find the area and Perimeter of a rectangle.
5. Write a program in Java to find the maximum of three numbers.
6. Write a Java Program to check whether a given year is a leap year.
7. Create four different classes with three of them containing the function main.Save the file with a different name than that of the class name and run each of the classes with the main function.
8. Write a Java program to reverse a number entered as a command line argument.
9. Write a Java program to count the number of digits entered through the command line argument.
10. Write a Java program to find all the multiples of 3 within a given range where the starting and ending values are entered through a command line argument.

Assignment – 2: Constructors & Inheritance

1. Write a class, Grader, which has an instance variable, score, an appropriate constructor and appropriate methods. A method, lettergrade (), that returns the letter grade as O/E/A/B/C/F. Now write a demo class to test the Grader class by reading a score from the user, using it to create a Grader object after validating that the value is not negative and is not greater than 100. Finally, call the letterGrade() method to get and print the grade.
2. Write a class, Commission, which has an instance variable, sales; an appropriate constructor; and a method, commission() that returns the commission. Now write a demo class to test the Commissionclass by reading a sale from the user, using it to create aCommission object after validating that the value is not negative.Finally, call the commission() method to get and print the commission. If the sales are negative, your demo should print themessage "Invalid Input".
3. For a Mobile Shop project, create a "Telephone" class with details like mobile_id, model_name and available_quantity in "Phone" package. Inherit from this class and create a class for"smart_phone" with necessary information like enabled_5G, foldable anddual_screen in package "Smart". The customer executive tries to display all smart_phone details (mobile_id, model_name, available_quantity, enabled_5G, foldable and dual_screen) and updates the quantity information, whenever the customer purchases the smart_phone. Write the necessary java programs to implement this scenario and test with user inputs.
    4. An educational institution maintains a database of its employees. The database is divided into a number of classes whose hierarchical relationships are shown below. Write all the classes and define the methods to create the database and retrieve individual information as and when needed. Write a driver program to test the classes. Staḃ (code, name), Teacher (subject, publication) is a Staff, Officer (grade) is a Staff, Typist (speed) is a Staff RegularTypist (remuneration) is a Typist, and CasualTypist (daily wages) is a Typist.

Assignment – 3: Flow Control

1. The process of finding the largest value (i.e., the maximum of a group of values) is used frequently in computer applications. For example, a program that determines the winner of a sales contest would input the number of units sold by each salesperson. The salesperson who sells the most units wins the contest. Build a Java application that inputs a series of 10 integers and determines and prints the largest integer. Your program should use at least the following three variables:
   a. counter: A counter to count to 10 (i.e. to keep track of how many numbers have been input and to determine when all 10 numbers have been processed).
   b. number: The inter most recently input by the user.
   c. largest: The largest number found so far.
   Note: Every time the sales figure of one employee is entered, the application should ask the user if they want to enter any more sales figures of a salesperson!

2. Write an application that prompts the user to enter the size of the side of a square, and then displays a hollow square of that size made of asterisks. Your program should work for squares of all side lengths between 1 and 20.

3. Write a program to compute the following formula.
   e= 1/0!+ 1/1! +½! + ⅓!+................+ 1/n!

4. Using an enhanced for (for-each) loop, copy the content of one 3-dimensional array to another 3-dimensional array and display its contents.

5. Create the following vase pattern using a loop:

```
            ************
             \          /
             /          \
             \          /
             /          \
             \          /
             /          \
            ************
```

Assignment – 4: Inheritance and Dynamic Polymorphism

1. Create a general class ThreeDObject and derive the classes Box, Cube, Cylinder and Cone from it. The class ThreeDObject has methods wholeSurfaceArea( ) and volume( ). Override these two methods in each of the derived classes to calculate the volume and whole surface area of each type of three-dimensional object. The dimensions of the objects are to be taken from the users and passed through the respective constructors of each derived class. Write a main method to test these classes.
2. Create a base class Building that stores the number of floors of a building, the number of rooms and its total footage. Create a derived class House that inherits the Building and also stores the number of bedrooms and bathrooms. Demonstrate the working of the classes.
3. In the earlier program, create a second derived class Office that inherits the Building and stores the number of telephones and tables. Now demonstrate the working of all three classes.
4. Create a base class Distance which stores the distance between two locations in miles and a method travelTime(). The method prints the time taken to cover the distance when the speed is 60 miles per hour. Now in a derived class DistanceMKS, override travelTime() so that it prints the time assuming the distance is in kilometres and the speed is 100 km per second. Demonstrate the working of the classes.
5. Create a base class called "vehicle" that stores the number of wheels and speed. Create the following derived classes –"car" that inherits "vehicle" and also stores the number of passengers.

"truck" that inherits "vehicle" and also stores the load limit.

Write a main function to create objects of these two derived classes and display all the information about "car" and "truck". Also, compare the speed of these two vehicles - car and truck and display which one is faster.

Assignment – 5: Abstract class & Interface in Java.

1. Design an abstract class having two methods. Create Rectangle and Triangle classes by inheriting the shape class and override the above methods to suitably implement for Rectangle and Triangle class.
2. Write a program to create a class named Vehicle having protected instance variables regnNumber, speed, colour, ownerName and a method showData( ) to show "This is a vehicle class". Inherit the Vehicle class into subclasses named Bus and Car having individual private instance variables route Number in Bus and manufacturer Name in Car and both of them having showData( )method showing all details of Bus and Car respectively with the content of the super class's showData ( ) method.
3. Create an interface Department containing attributes deptName and deptHead. It also has abstract methods for printing the attributes. Create a class hostel containing hostelName, hostelLocation and numberofRooms. The class contains methods for getting and printing the attributes. Then write a Student class extending the Hostel class and implementing the Department interface. This class contains attributes studentName, regdNo, electiveSubject andavgMarks. Write suitable getData and printData methods for this class. Also, implement the abstract methods of the department interface. Write a driver class to test the Student class. The program will be menu driven containing the options:
   i) Admit new student
   ii) Migrate a student
   iii) Display details of a student

For the third option, a search is to be made on the basis of the entered registration number.

4. Create an abstract class Accounts with the following details:

Data Members:
    (a) Balance
    (b) accountNumber
    (c) accountHoldersName
    (d) address

Methods:
    (a) withdrawl()- abstract
    (b) deposit()- abstract
    (c) display() to show the balance of the account number

Create a subclass of this class SavingsAccount and add the following details:
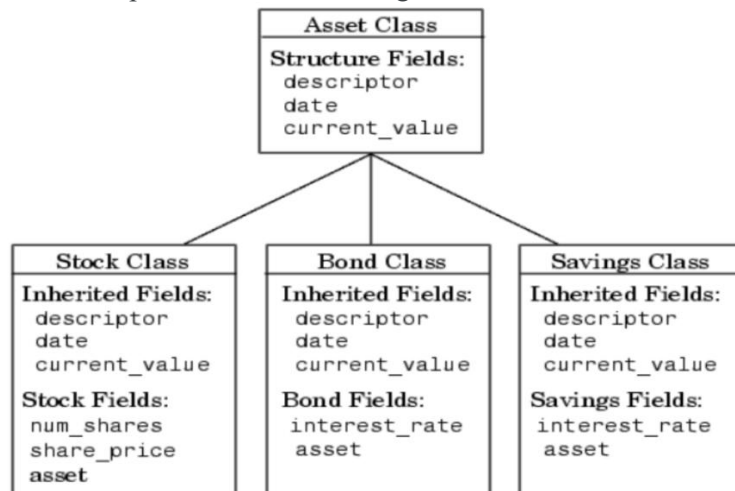

Data Members:
    (a) rateOfInterest

Methods:
    (a) calculateAount()

5. Implement the below Diagram.

Here, Asset class is an abstract class containing an abstract methoddisplayDetails() method. Stock, bond and Savings class inherit the Asset class and displayDetails() method is defined in every class.

Assignment – 6: Threads, Multithreading & Thread Synchronization

1. Write a Java program in which a total of 4 threads should run. Set different priorities for the thread.
2. Write a Java Program to Create a Thread that Implements the Runnable Interface.
3. Write a Java Program to Check the Priority Level of a Thread.
4. Write a Java Program Defining Thread by Extending the Thread class.
5. Write a Java Program to Get the Name of a Running Thread.
6. Write a Java Program to Stop a Thread.
7. Write a Java Program to Check Whether Define a Thread Class Without Defining run() Method in the Class.
8. Write a Java Program to Show that Method Will be Verified Whether it is Synchronized or Not.
9. Create 4 threads with priority 1,3,5,7 respectively. Update a counter in each of the threads for 10 ms. Print the final value of the count for each thread.
10. Write a Java Program to Use Method Level Synchronization.

Assignment – 7: Exception Handling& Collections

1. Write a Java program using try and catch to generate Array Index Out of Bound Exception and Arithmetic Exception.
2. Write a class that keeps a running total of all characters passed to it(one at a time) and throws an exception if it is passed a non-alphabetic character.
3. Write a program that takes a value at the command line for which the factorial is to be computed. The program must convert the string toits integer equivalent. Three possible user input errors can prevent the program from executing normally.
   - The first error occurs when the user provides no argument while executing the program, and an arrayIndexOutOfBoundsException is raised. You must write a catch block for this.
   - The second error is NumberFormatException which is raised in case the user provides a non-integer (float double) value at the command line.
   - The third error is IllegalArgumentException. This needs to be thrown manually if the value at the command line is 0.
4. Create a user-defined exception named CheckArgument to check the number of arguments passed through the command line. If the number of arguments is less than 5, throw the CheckArgumentexception, and print the addition of all the five numbers.
5. Write a Java program to create a custom Exception that would handle at least 2 kinds of Arithmetic Exceptions while calculating a given equation (e.g. X+Y*(P/Q)Z-I).
6. Given an element write a program to check if an element(value) exists in ArrayList.
7. Write a program to convert LinkedList to ArrayList.
8. Write a program to iterate TreeMap in java.

Assignment 8: Keyboard input and string handling in Java

1. Write a Java program for calculating Factorial. Number should be taken through user input (Using Scanner, BufferedReader both).
2. Write a Java program to reverse a string. (String will be taken as user input through the console).
3. Write a Java Program to Find the Length of the String.
4. Write a Java Program to Remove the White Spaces from a String.
5. Write a Java Program to Use the Equals Method In a String Class.
6. Write a Java Program to Count and Replace the First Occurrence of a String.
7. Write a Java Program to Validate an Email Address Format.
8. Write a Java Program to Access the Index of the Character or String.
9. Write a Java Program to Find First and Last Occurrence of a given character in a String.
10. Write a Java Program to Store String Literals Using String Buffer.

Annexure – II (Java based minor project – As per Software Development Life Cycle)

1. E-commerce project in java using JDBC and MYSQL
2. Online Pharmacy Management System using JDBC and MYSQL
3. Home Improvement System Using JDBC and MYSQL
4. Jewellery Shop Management Using JDBC and MYSQL
5. Student Management System Using JDBC and MYSQL
6. Hotel Management Project Using JDBC and MYSQL
7. Hospital Management System Using JDBC and MYSQL
8. Online Bike Service Booking Using JDBC and MYSQL
9. Online Food Delivery Using JDBC and MYSQL
10. Online Movie Ticket Booking Using JDBC and MYSQL
11. Bank management system Using JDBC and MYSQL

University of Engineering and Management

Institute of Engineering & Management, New Town Campus
University of Engineering & Management, Jaipur
Syllabus for MCA Admission Batch 2023, 2nd Semester

Subject Name: Data Communication & Computer Networks **Credit: 4**

Subject Code: MCACC203 **Lecture Hours: 40**

Name of the Course: **Data Communication & Computer Networks**	
Course Code: MCACC203	**Semester: 2nd**
Duration: 40 Hrs.	**Maximum Marks: 100**
Teaching Scheme	**Examination Scheme**
Theory: 3	End Semester Exam: 70
Tutorial: 1	Continuous Assessment: 30
Practical: 0	Practical Sessional Internal Continuous Evaluation: NA
Credit: 4	Practical Sessional External Examination: NA

Aim:	
Sl. No.	
1	To gain Knowledge of uses and services of Computer Network
2	To enhance Ability to identify types and topologies of network.
3	To gain Understanding of analog and digital transmission of data.
Objective:	
Sl. No.	
1	To deliver comprehensive view of Computer Network.
2	To enable the students to understand the Network Architecture, Network type and topologies
3	To understand the design issues and working of each layer of OSI model.
4	To familiarize with the benefits and issues regarding Network Security.
Pre-Requisite:	
Sl. No.	
1.	Knowledge of basic data communication & network security.

Course Outcome:	
1.	Identify the different components in a Communication System and their respective roles.
2.	Describe the technical issues related to the Networks
3.	Defining the standard model and protocols of networking
4.	Understand the basics of data communication, networking, internet and their importance.

Module number	Topic	Sub-topics	Mapping with Industry and International Academia	Lecture Hours
1	**Introduction to Networks & Network Model**	Introduction to communication systems, components, Transmission Impairments, Performance criteria of a communication system. Goals of computer Network, Networks:Classification, Components and Topology, categories of network[LAN, MAN,WAN];Internet: brief history, internet today;	*International Academia:* https://online.stanford.edu/courses/cs144-introduction-computer-networking *AICTE-prescribed syllabus:* https://makautexam.net/aicte_details/Syllabus/MCA/sem221.pdf	7

		Protocolsand standards; OSI and TCP/IP model	*Industry Mapping and Gap Analysis:* Basic data communication & network system was previously available in the MCA syllabus and is in sync with the syllabus of AICTE and the Stanford University. All the basic concepts are as per the industry standards.	
2	**Physical Layer**	**Data, signal and Transmission: Analog and Digital, Transmission modes,Overview of data[analog & digital], signal[analog & digital], transmission [analog & digital] & transmission media [guided & unguided]; Circuit switching: time division & space division switch,TDM bus; Telephone Network.**	*International Academia:* https://online.stanford.edu/courses/cs144-introduction-computer-networking *AICTE-prescribed syllabus:* https://makautexam.net/aicte_details/Syllabus/MCA/sem221.pdf *Industry Mapping& Gap Analysis:* Practical knowledge on digital electronics circuit related to signal oscillation and transmission as well as various types of transmission media should be incorporated as per industry standard.	6
3	**Data Link Layer**	**Data link layer:** Types of errors, framing [character and bit stuffing], error detection & correction methods; Flow control; Protocols: Stop & wait ARQ **Medium access sub layer:** Point to point protocol, FDDI, token bus, token ring; Reservation, polling, concentration; Multiple access protocols: ALOHA, CSMA,FDMA, TDMA, CDMA; Ethernet	*International Academia:* https://online.stanford.edu/courses/cs144-introduction-computer-networking *AICTE-prescribed syllabus:* https://makautexam.net/aicte_details/Syllabus/MCA/sem221.pdf *Industry Mapping and Gap Analysis:* Needs to add practical exposure to design and implement various error detection and correction methods using any programming paradigm.	6

4	Network Layer	Concepts of Internetworking & devices: Repeaters, Hubs, Bridges, Switches, Router, Gateway; **Addressing**: Internet address, classful address, **Routing:** techniques, static vs. dynamic **routing Protocols:** IP, IPV6.	*International Academia:* https://online.stanford.edu/courses/cs144-introduction-computer-networking *AICTE-prescribed syllabus:* https://makautexam.net/aicte_details/Syllabus/MCA/sem221.pdf *Industry Mapping and Gap Analysis:* Needs to incorporate hands-on training on network hardware devices and should have some programming knowledge on routing strategies as per industry requirement.	6
5	Transport Layer	**Process to process delivery; Details of UDP; Details of TCP;Congestion control algorithm: Leaky bucket algorithm, Tokenbucket algorithm, Quality of services [QoS]**	*International Academia:* https://online.stanford.edu/courses/cs144-introduction-computer-networking *AICTE-prescribed syllabus:* https://makautexam.net/aicte_details/Syllabus/MCA/sem221.pdf *Industry Mapping and Gap Analysis:* Needs to add practical exposure to design and implement various transport layer protocols using any programming paradigm which is the key requirement of IT industry.	6
6	Application Layer	**Details of Application Layer protocols/services such as** **HTTP, FTP, Telnet, SMTP & WWW and other**	*International Academia:* https://online.stanford.edu/courses/cs144-introduction-computer-networking *AICTE-prescribed syllabus:* https://makautexam.net/aicte_details/Syllabus/MCA/sem221.pdf	5

				Industry Mapping and Gap Analysis:	
				Needs to introduce various applicationlayer protocols using any programming paradigm which is the key requirement of IT industry as well as academia.	
7	**Cryptography & Satellite Communication**	Introduction to data security & cryptography (private key, public key, ISO standards), Digital Signature, Firewalls [technology & applications] **Brief concepts of Satellite Communication such as LEO, GEO.**	*International Academia:* https://online.stanford.edu/courses/soe-_y0001-cryptography-i *AICTE-prescribed syllabus:* https://makautexam.net/aicte_details/Syllabus/MCA/sem221.pdf *Industry Mapping and Gap Analysis:* Needs to incorporate in-depth details of cryptography and related algorithms and should facilitate such programming environment to implement these algorithms as per industry requirements.	4

University of Engineering and Management

Institute of Engineering & Management, New Town Campus
University of Engineering & Management, Jaipur
Syllabus for MCA Admission Batch 2023, 2nd Semester

Subject Name: Advanced Data Structure   **Credit: 4**

Subject Code: MCACC204   **Lecture Hours: 36**

Name of the Course: **Advanced Data Structure**	
Course Code: MCACC204 & MCACC294	**Semester: 2nd**
Duration: 40 Hrs.	**Maximum Marks: 100**
Teaching Scheme	**Examination Scheme**
Theory: 3	End Semester Exam: 70
Tutorial: 1	Continuous Assessment: 30
Practical: 2	Practical Sessional Internal continuous evaluation: 40
Credit: 4+2	Practical Sessional external examination: 60
Aim:	
Sl. No.	
1	To gain Knowledge of Various aspects of algorithm development
2	To enhance Ability to identify qualities of a good solution
3	To implement learned algorithm design techniques and data structures to solve problems.

Objective:	
Sl. No.	
1	The fundamental design, analysis, and implementation of basic data structures.
2	Basic concepts in the specification and analysis of programs.
3	Principles for good program design, especially the uses of data abstraction.
4	Significance of algorithms in the computer field
Pre-Requisite:	
Sl. No.	
1.	Proficiency in one high level programming language

Course Outcome:	
1.	On completion of this course students are expected to learn various data structures, their usages, merits and limitations.
2.	On completion of this course students are expected to design and analyze various algorithms.
3.	On completion of this course students are expected to do a comparative analysis among different data structures and decide on the appropriate data structure to be used in a given scenario.
4.	On completion of this course students are expected to acquire adequate knowledge and skills to solve a real life software problem.

University of Engineering & Management, Jaipur

3rd Semester Syllabus for MCA Admission Batch 2023

Subject Name: Operating System and System Software   **Credit: 04**

Subject Code: MCA301 & MCA391   **Lecture Hours: 40 Hrs.**

Name of the Course: Operating System and System Software & Operating Systems Laboratory (Unix)	
Course Code: MCA301 & MCA391	**Semester: 3**
Duration: 40 Hrs.	**Maximum Marks: 100**
Teaching Scheme	**Examination Scheme**
Theory: 3L	End Semester Exam: 100
Tutorial: 1T	Continuous Assessment: 100
Practical: 2	Practical Sessional Internal continuous evaluation: 100
Credit: 4 +2	Practical Sessional external examination: 100

Aim:	
Sl. No.	
1	To understand the system architecture of an operating system
2	Ability to apply CPU scheduling algorithms to manage tasks.
3	Initiation into the process of applying memory management methods and allocation policies.
4	Knowledge of methods of prevention and recovery from a system deadlock.
Objective:	
Sl. No.	
1	To deliver a detailed knowledge of integral software in a computer system – Operating System.
2	To understand the workings of an operating system as a resource manager.
3	To familiarize the students with Process and Memory management.
4	To describe the problem of process synchronization and its solution.
Pre-Requisite:	
Sl. No.	
1.	You should know about Computer Architecture and Organization.
2	Proficiency in C or another programming language.
3	Familiarity with Assembly language.

Course Outcome:

1.	Understand Operating System Concepts: Gain knowledge about operating system functions, generations, processes, and threads.
2.	Develop Process Scheduling Algorithms: Create algorithms for process scheduling, considering CPU utilization, throughput, turnaround time, waiting time, and response time.
3.	Identify the deadlock situation and provide an appropriate solution so that the protection and security of the operating system are also maintained.
4.	Learn File Handling and Process Control: Understand the basics of File, Device, and Disk Storage Management

University of Engineering and Management
Institute of Engineering & Management, New Town Campus
University of Engineering & Management, Jaipur
Syllabus for MCA Admission Batch 2023, 3rd Semester

Subject Name: Software Engineering & TQM   **Credit: 04**

Subject Code: MCA302, MCA392   **Lecture Hours: 40 Hrs.**

Name of the Course: Software Engineering & TQM	
Course Code:	**Semester: 3rd**
Duration: 40 Hrs.	**Maximum Marks: 100**
Teaching Scheme	**Examination Scheme**
Theory: 3	End Semester Exam: 100
Tutorial: 1	Continuous Assessment: 100
Practical: 2	Practical Sessional internal continuous evaluation: 100
Credit: 4+2	Practical Sessional external examination: 100

Aim:

Sl. No.	
1	To gain knowledge of various aspects of software engineering project management.
2	To enhance ability to identify qualities of a good solution
3	To implement learned algorithm/design techniques to solve problems

Objective:

Sl. No.	
1	The fundamental knowledge of software engineering
2	The different basic models need to implement different project problems
3	The various design methods to develop the software system
4	The quality and other issues related to the software products and systems

Pre-Requisite:

Sl. No.	
1.	Knowledge in fundamental theories of computer science and one programming language

Course Outcome:

1.	On completion of this course students are expected to learn fundamentals and different models of software engineering.
2.	On completion of this course students are expected to learn different aspects of requirement analysis in software project management.
3.	On completion of this course students are expected to learn various types of software design and concepts of coding.
4.	On completion of this course students are expected to learn different types of testing and quality issues.

University of Engineering & Management, Jaipur
Syllabus for MCA Admission Batch 2023, 3rd Semester

Subject Name: Data Science and Data Analytics   **Credit: 04**

Subject Code: MCA303 & MCA395   **Lecture Hours: 40 Hrs.**

Name of the Course: **Data Science and Data Analytics**	
Course Code: MCA303 & MCA395	**Semester: 3rd**
Duration: 40Hrs.	**MaximumMarks: 100**
Teaching Scheme	**Examination Scheme**
Theory:3	End Semester Exam:100
Tutorial: 1	Continuous Assessment:100
Practical:2	Practical Sessional internal continuous evaluation:100
Credit:4+3	Practical Sessional external examination:100

Aim:	
Sl.No.	
1	To gain Knowledge of Various aspects of data science and data analytics.
2	To enhance the ability to identify qualities of a good solution of AI, Big Data, Data Mining etc.
3	To implement learned analytical techniques and data science to solve problems.

Objective:	
Sl.No.	
1	Provide you with the knowledge and expertise to become a proficient data scientist.
2	Demonstrate an understanding of statistics and machine learning concepts that are vital for data science.
3	Produce Python code to statistically analyze a dataset.
4	Critically evaluate data visualizations based on their design and use for communicating stories from data.
Pre-Requisite:	
Sl.No.	
1.	Proficiency in data related to AI,ML,Big Data etc.
Course Outcome:	
1.	Explain how data is collected, managed and stored for data science.
2.	Understand the key concepts in data science, including their real-world applications and the toolkit used by data scientists.
3.	Implement data collection and data mining techniques using database.
4.	Understand handling of big data.

Module number	Topic	Sub-topics	Mapping with Industry and International Academia	Lecture Hours	Corresponding Lab Assignment
1	Introduction to Data Management:	Brief idea about Data Warehousing, Architecture and Data Flows, Data pre-processing before analysis, Data preparation, OLAP & OLTP, Case study.	*International Academia:* https://ocw.mit.edu/courses/res-str-002-data-management-spring-2016/ *AICTE-prescribed syllabus:* https://makautexam.net/aicte_details/CourseStructure/MCA21.pdf *Industry Mapping:* The concepts delivered are in sync with the industry standards	4	1. Write a program for displaying reversal of a number. 2. Implement python script to read person's age from keyboard and display whether he is eligible for voting or not. 3. Implement python script to check the given year is leap year or not. 4. Implement Python Script to generate prime numbers series up to n 5. To display elements of list in reverse order. 6. Implement python script to accept line of text and find the number of characters, number of vowels and number of blank spaces in it. 7. Write a program which makes use of function to display all such numbers which are divisible by 7 but are not a multiple of 5, between 1000 and 2000.

					8. Implement a python script for factorial of number by using recursion.
2	Introduction to Data Mining:	Brief idea about Data Mining, It's goals and techniques, Architecture and KDD Process, Knowledge representation methods.	*International Academia:* https://ocw.mit.edu/courses/15-062-data-mining-spring-2003/ *AICTE-prescribed syllabus:* https://makautexam.net/aicte_details/CourseStructure/MCA21.pdf *Industry Mapping:* The concepts delivered are in sync with the industry standards	4	1. Write a program which accepts a sequence of comma-separated numbers from console and generate a list and a tuple which contains every number. Suppose the following input is supplied to the program: 34, 67, 55, 33, 12, 98. Then, the output should be: ['34', '67', '55', '33', '12', '98'] ('34',67', '55', '33', '12', '98'). 2. Write Python script to copy file contents from one file to another. 3. Implement a python script to check the element is in the list or not by using Linear search & Binary search. 4. Implement a python script to arrange the elements in sorted order using Bubble, Selection, Insertion and Merge sorting techniques.

					5. Write a python program by using exception handling mechanism. 6. Write a python program to perform various database operations (create, insert, delete, update).
3	Statistics and Analytics:	Data Visualization, Summarize and describe data sets using a measures such as Central tendency and variability, Learn probability, Central Limit Theorem and much more to draw inferences	*International Academia:* https://ocw.mit.edu/course s/15-071-the-analytics-edge-spring-2017/pages/visualization/ *AICTE-prescribed syllabus:* https://makautexam.net/aict e_details/CourseStructure/ MCA21.pdf *Industry Mapping:* The concepts delivered are in sync with the industry standards	6	1. Write a program to compute summary statistics such as mean, median, mode, standard deviation and variance of the given different types of data. 2. Write a program to demonstrate Regression analysis with residual plots on a given data set.
4	Introduction to Big Data Analytics:	Understand the basic concepts of Big Data and Hadoop as processing platforms for Big Data, Managing Big Data - Learn and Use Hadoop Ecosystem tools for data ingestion, extraction and	*International Academia:* **https://prolearn.mit.edu/d ata-science-and-big-data-analytics-making-data-driven-decisions**	4	

		management. Introduction to Hive.			
			AICTE-prescribed syllabus: https://makautexam.net/aicte_details/CourseStructure/MCA21.pdf ***Industry Mapping:*** The concepts delivered are in sync with the industry standards		
5	Cloud Computing:	Introduction to Cloud Computing, types, services, applications, Security & research scope. Internet of Things:	***International Academia:*** ***AICTE-prescribed syllabus:*** https://makautexam.net/aicte_details/CourseStructure/MCA21.pdf ***Industry Mapping:*** The concepts delivered are in sync with the industry standards	4	
6	Introduction to IOT and WSN:	Introduction to IOT and WSN, Basic concepts of Robotics Using Arduino & Rasberry Pi Programming.	***International Academia:*** **https://professionalprograms.mit.edu/online-program-internet-of-things/** ***AICTE-prescribed syllabus:*** https://makautexam.net/aicte_details/CourseStructure/MCA21.pdf	4	https://makautexam.net/aicte_details/CourseStructure/MCA21.pdf

			Industry Mapping: The concepts delivered are in sync with the industry standards		
7.	Introduction to NLP & AI	Introduction to artificial intelligence, Brief idea about Natural Language Processing.	*International Academia:* https://ocw.mit.edu/courses/6-034-artificial-intelligence-fall-2010/ *AICTE-prescribed syllabus:* https://makautexam.net/aicte_details/CourseStructure/MCA21.pdf *Industry Mapping:* The concepts delivered are in sync with the industry standards	4	Python lab for text analysis 1. Choose some book-length document and download it. 2. Count its characters, lines and words. 3. Count sentences, vocabulary, and the like. 4. Show collocations, common context, concordance, and similar relationships among the words. 5. Plot a lexical dispersion or two. 6. Plot a frequency distribution of the most common words.
8.	Basic concepts of Machine Learning	To implement linear regression, Data classification, Data clustering – To learn how to create segments based on similarities using K-Means and Hierarchical clustering, Case study using Python.	*International Academia:* **https://openlearninglibrary.mit.edu/courses/course-v1:MITx+6.036+1T2019/about** *AICTE-prescribed syllabus:* https://makautexam.net/aicte_details/CourseStructure/MCA21.pdf *Industry Mapping:* The concepts delivered are in	4	1. Write a program to demonstrate the working of the decision tree-based ID3 algorithm. 2. Write a program to implement the Naïve Bayesian classifier for a sample training data set stored as a .CSV file.

9.	Applications of Machine Learning.	Time series, Decision trees, Support Vector Machine, Neural Networks, Case Study Using MATLAB.	***International Academia:*** **https://openlearninglibrary.mit.edu/courses/course-v1:MITx+6.036+1T2019/about** ***AICTE-prescribed syllabus:*** https://makautexam.net/aicte_details/CourseStructure/MCA21.pdf ***Industry Mapping:*** The concepts delivered are in sync with the industry standards	6	1. Write a program to implement k-Nearest Neighbour algorithm to classify the iris data set. 3. Write a program to implement k-Means clustering algorithm to cluster the set of data stored in .CSV file.

Syllabus for MCA Admission Batch 2023, 3rd Semester

Subject Name: Statistics and Numerical Techniques   **Credit: 04**

Subject Code: MCA304   **Lecture Hours: 48 Hrs.**

Name of the Course: Statistics and Numerical Techniques	
Course Code: MCA304	**Semester: 3rd**
Duration: One Semester	**Maximum Marks: 100**
Teaching Scheme: Lecture method	**Examination Scheme**
Theory: 03 L	End Semester Exam: 100
Tutorial: 01 L	Continuous Assessment: 100
Credit: 4	
Aim:	
Sl. No.	
1	Equip students with the skills to collect, organize, and summarize data effectively, enabling them to understand the fundamentals of descriptive and inferential statistics.
2	Provide students with the knowledge of numerical techniques for solving complex mathematical problems, fostering proficiency in methods such as root finding, interpolation, and numerical integration.
3	Enable students to apply statistical and numerical methods to real-world scenarios across various disciplines,

	promoting critical thinking, problem-solving, and ethical data practices.

Objective:	
Sl. No.	
1	Develop students' understanding of different data types and the ability to collect, organize, and summarize data effectively, using descriptive statistics techniques.
2	Enable students to grasp the principles of statistical inference, including hypothesis testing, confidence intervals, and regression analysis, to draw meaningful conclusions from sample data about populations.
3	Equip students with proficiency in numerical techniques such as root finding, interpolation, and numerical integration, enabling them to solve complex mathematical problems encountered in various disciplines.
4	Foster the application of statistical and numerical methods in practical scenarios across diverse fields, through case studies and hands-on exercises, promoting critical thinking, problem-solving, and ethical data practices.
Pre-Requisite:	
Sl. No.	
1.	Basic knowledge of senior secondary and under graduate levels mathematics.
Course Outcome:	
1.	Upon completion of the course, students will demonstrate proficiency in collecting, analyzing, and interpreting data using appropriate statistical techniques, enhancing their ability to make informed decisions based on empirical evidence.
2.	Students will be able to apply numerical techniques like interpolation and numerical integration to solve complex mathematical problems encountered in engineering, science, and other disciplines, effectively utilizing computational tools to address real-world challenges.
3.	Students will be able to apply numerical techniques like solution of equation and system of linear equations to solve complex mathematical problems.
4.	At the end of the course, students will be able to apply numerical methods like numerical solution of ODE to solve complex mathematical problems encountered in engineering, science, and other disciplines to address day-

		to-day life critical problems.

Analyze the impact of different market structures on consumers, focusing on factors like price, quality, and choice.
Analyze their effectiveness and impact on the economy.
** All the assignments are in line with entrance exams for premier B-Schools and GS Paper-I of UPSC CSE.

University of Engineering and Management
Institute of Engineering & Management, New Town Campus
University of Engineering & Management, Jaipur
Syllabus for MCA Admission Batch 2023, 3rd Semester

Subject Name: Environment and Ecology   **Credit: 03**

Subject Code: MCA374   **Lecture Hours: 36 Hrs.**

Name of the Course: **ENVIRONMENT AND ECOLOGY**	
Course Code: MCAN383	**Semester: THIRD**
Duration: 36	**Maximum Marks: 100**
Teaching Scheme	**Examination Scheme**
Theory: 1	End Semester Exam: 100
Tutorial: 1	Continuous Assessment: 100
Credit: 2	
Aim:	
Sl. No.	
1	Imparting knowledge about the environment and ecosystem around us.
2	Imparting knowledge about the natural resources, biodiversity, and the importance of their conservation
3	**Environmental Management and Pollution Control**

Objective:	
Sl. No.	
1	Students will gain knowledge about the environment and ecosystem.
2	Students will learn about natural resources, biodiversity, and the importance of their conservation
3	**To make students aware of problems of environmental pollution, its impact on humans and the ecosystem, and control measures.**
4	**At the end of the course, students will learn about waste disposal measures and environmental management.**
Pre-Requisite: NA	
Course Outcome:	
1.	**Define Environmental factors and the basic components of the ecosystem.**
2.	**Understand and explain the importance of Plantation.**
3.	**List the pollutants and analyze the importance of reducing/ controlling environmental pollution.**
4.	**Analyze the importance of Biohazards, Environmental and Social Safety**

Module number	Topic	Sub-topics	Mapping with Industry and International Academia	Lecture Hours
I	**Overview**	Basic ideas of environment, basic concepts, man, society & environment, their interrelationship Mathematics of population growth and associated problems, Importance of population study in environmental engineering, the definition of resource, types of resource, renewable, non-renewable, potentially renewable, effect of excessive use vis-à-vis population growth, Sustainable Development. Materials balance: Steady state conservation system, steady state system with non-conservative pollutants, step function. Importance, scope and principles of EIA.	*International Academia:* https://online.stanford.edu/courses/xeiet100-clean-renewable-energy-storage-sustainable-future *AICTE-prescribed syllabus:* *https://old.aicte-india.org/downloads/Environmental_Studies_curriculum.pdf* *Industry Mapping:* https://cbs.umn.edu/populus/downloadplant(WWTP) .	6
II	**Ecology**	Elements of ecology: System, open system, closed system, the definition of ecology, species, population, community, definition of ecosystem- components types and function. (1L) Structure and function of the following ecosystem: Forest ecosystem, Grassland ecosystem, Desert ecosystem, Aquatic ecosystems, Mangrove ecosystem (special reference to Sundar ban); Food chain [definition and one example of each food chain], Food web.(2L) Biogeochemical Cycle- definition, significance, flow chart of different cycles with only elementary reaction [Oxygen, carbon, Nitrogen, Phosphate, Sulphur]. (1L) Biodiversity- types, importance, Endemic species, Biodiversity Hot-spot, Threats to biodiversity, Conservation of biodiversity.(2L)	*International Academia:* *https://ocw.mit.edu/courses/1-020-ecology-ii-engineering-for-sustainability-spring-2008/* *AICTE-prescribed syllabus:* *https://old.aicte-india.org/downloads/Environmental_Studies_curriculum.pdf* *Industry Mapping:* *https://vsni.co.uk/solutions/ecology* *https://www.helsinki.fi/en/researchgroups/statistical-ecology/software*	6

| III | Air Pollution | Atmospheric Composition: Troposphere, Stratosphere, Mesosphere, Thermosphere, Tropopause and Mesopause. (1L) Energy balance: Conductive and Convective heat transfer, radiation heat transfer, simple global temperature model [Earth as a black body, earth as albedo], Problems.(1L) Green house effects: Definition, impact of greenhouse gases on the global climate and consequently on sea water level, agriculture and marine food. Global warming and its consequence, Control of Global warming. Earth's heat budget.(1L) Lapse rate: Ambient lapse rate Adiabatic lapse rate, atmospheric stability, temperature inversion (radiation inversion).(2L) Atmospheric dispersion: Maximum mixing depth, ventilation coefficient, effective stack height, smokestack plumes and Gaussian plume model.(2L) Definition of pollutants and contaminants, Primary and secondary pollutants: emission standard, criteria pollutant. Sources and effect of different air pollutants- Suspended particulate matter, oxides of carbon, oxides of nitrogen, oxides of sulphur, particulate, PAN. (2L) Smog, Photochemical smog and London smog. Depletion Ozone layer: CFC, destruction of ozone layer by CFC, impact of other green-house gases, effect of ozone modification. (1L) Standards and control measures: Industrial, commercial and residential air quality standard, control measure (ESP. cyclone separator, bag house, catalytic converter, scrubber (ventury), Statement with brief reference). (1L) | *International Academia:* https://ocw.mit.edu/courses/1-84j-atmospheric-chemistry-fall-2013/pages/lecture-notes/ *AICTE-prescribed syllabus:* *https://old.aicte-india.org/downloads/Environmental_Studies_curriculum.pdf* *Industry Mapping:* https://www.who.int/europe/tools-and-toolkits/airq---software-tool-for-health-risk-assessment-of-air-pollution | 6 |
| IV | Water Pollution | Pollutants of water, their origin and effects: Oxygen demanding wastes, pathogens, nutrients, Salts, thermal application, heavy metals, pesticides, volatile organic compounds.DO, 5-day BOD test, Seeded BOD test, BOD reaction rate constants, Effect of oxygen demanding wastes on river [deoxygenating, reaeration], COD, Oil, Greases, pH. Lake: Eutrophication [Definition, source and effect]. Waste water standard [BOD, COD], Water Treatment system,primary and secondary treatments, tertiary treatment definition.Water pollution due to the toxic elements. | *International Academia:* *https://online.stanford.edu/courses/cee270m-aquatic-and-organic-chemistry-environmental-engineering* *AICTE-prescribed syllabus:* *https://old.aicte-india.org/downloads/Environmental_Studies_curriculum.pdf* *Industry Mapping:* | 6 |

		USEPA and WHO guidelines for drinking water.	*Activated Sludge Simulation (ASIM), Sewage Treatment Operation and Analysis Over Time (STOAT), and GPS-X are the common softwares used for waste water treatment plant(WWTP).*	
V	**Lithosphere**	Lithosphere; Internal structure of earth, rock and soil (1L). Solid Waste: Municipal, industrial, commercial, agricultural, domestic, pathological and hazardous solid wastes; Recovery and disposal method- Open dumping, Land filling, incineration, composting, recycling. Solid waste management and control (hazardous and biomedical waste).(2L)	*International Academia:* *https://ocw.mit.edu/courses/1-34-waste-containment-and-remediation-technology-spring-2004/* *AICTE-prescribed syllabus:* *https://old.aicte-india.org/downloads/Environmental_Studies_curriculum.pdf* *Industry Mapping:* https://www.wasteworksonline.com/	6
VI	**Noise pollution**	Definition of noise, effect of noise pollution, noise classification [Transport noise, occupational noise, neighbourhood noise] (1L) Definition of noise frequency, noise pressure, noise intensity, noise threshold limit value, equivalent noise level, L10 (18hr Index) ,n Ld.Noise pollution control. (1L)	*International Academia:* *No link found* *AICTE-prescribed syllabus:* *https://old.aicte-india.org/downloads/Environmental_Studies_curriculum.pdf* *Industry Mapping:* No software found	3
VII	**Environmental Management**	Environmental impact assessment, Environmental Audit, Environmental laws and protection act of India, Different international environmental treaty/ agreement/ protocol. Subject Name: Competitive Aptitude Training – III **Credit: 0.5**

Subject Code: MCASDP381 **Lecture Hours: 48 Hrs.**

Module number	Topic	Sub- topics	Mapping with International/National/ State Level Exams	Lecture Hours	Corresponding Assignment
1	**Quantitative Aptitude**	**Textbook:** Quantitative Aptitude for Competitive Examination **Author:** R.S Agarwal **Publishing House:** S. Chand 1. Simple & Compound Interest, 2. Number System, 3. Quadratic Equations	***National Exams:*** *1.UPSC Civil Services Exam (https://upsc.gov.in/sites/default/files/Notif-CSP-23-engl-010223.pdf), pg 25-26* *2. UPSC Combined Defence Services (https://upsc.gov.in/sites/default/files/Notif-CDS-I-Exam-2023-Engl-211222.pdf), pg 20-21* *3. Combined Graduate Level conducted by SSC (https://ssc.nic.in/SSCFileServer/PortalManagement/UploadedFiles/notice_CGLE_0304*	12	**1. Simple & Compound Interest:** • **Simple Interest Applications:** o Calculate the total interest and amount payable on a loan with simple interest. o Determine the time required to double an investment with simple interest. o Compare the simple interest earned on different principal amounts or at different interest rates. • **Compound Interest Applications:** o Calculate the compound interest and final amount of an investment over multiple years. o Compare the growth of an investment with different compounding frequencies (annual, semi-annual, quarterly,

			2023.pdf) pg. 20-22 **4. Intelligence Bureau ACIO** *(https://www.pw.live/exams/wp-content/uploads/2023/11/IB-ACIO-Recruitment-2023-Notification-Emp-News.pdf*)		monthly). o Determine the time required to double or triple an investment with compound interest.

			State Level Exams:
			1. *Civil Services Executive Exam (WBCS)* *(https://wbpsc.gov.in/Download?param1=20230225142430_Syllabus.pdf&param2=advertisement), pg 1*
			2. Miscellaneous Services Recruitment Examination (https://adda247jobs-wp-assets-prod.adda247.com/jobs/wp-content/uploads/sites/7/2022/11/21142422/2707970_2019.pdf *)* *pg 1*
					o Understand the concept of effective annual rate (EAR) and how it relates to nominal interest rates and compounding frequencies.
					
					2. Number System:
					
					• **Divisibility Rules:**
					  o Test the divisibility of numbers by 2, 3, 4, 5, 6, 8, 9, 10, and 11.
					  o Apply divisibility rules to simplify calculations and solve problems.
					• **Prime and Composite Numbers:**
					  o Identify prime and composite numbers.
					  o Find the prime factorization of composite numbers.
					  o Use prime factorization to find the highest common factor (HCF) and least common multiple (LCM) of numbers.
					• **Number Properties:**
					  o Understand the concepts of even and odd numbers, natural numbers, whole numbers, integers, rational and irrational numbers.
					  o Solve problems involving the properties of these number types.
					
					3. Quadratic Equations:

					Solving Quadratic Equations: - Solve quadratic equations using factoring, completing the square, and the quadratic formula. - Determine the nature of roots (real, equal, imaginary) of a quadratic equation. **Word Problems:** - Apply quadratic equations to solve real-world problems, such as finding the dimensions of a rectangle given its area and perimeter, or determining the trajectory of a projectile. **4. Quadratic Functions and Graphs:** - Graph quadratic functions andinterpret the graph to find the vertex, axis of symmetry, and intercepts. - Use the graph to solve quadratic equations and inequalities.

2	**Logical Reasoning**	**Textbook:** Verbal and Non-Verbal reasoning
		Author: R.S Agarwal
		Publishing House: S. Chand
		
		1. Puzzle
		   a) Classification Based Puzzle
		   b) Sequential Based Puzzle
		   c) Selection Based Puzzle
		   d) Ranking Based Puzzle
			National Exams:
			1.UPSC Civil Services Exam (https://upsc.gov.in/sites/default/files/Notif-CSP-23-engl-010223.pdf), pg 25-26
			2. UPSC Combined Defence Services (https://upsc.gov.in/sites/default/files/Notif-CDS-I-Exam-2023-Engl-211222.pdf), pg 20-21
			3. Combined Graduate Level conducted by SSC
				12	**1. Classification Based Puzzles:**
					
					    Grouping by Attributes: Provide a list of items (e.g., animals, fruits, professions) and ask students to classify them into groups based on shared characteristics (e.g., habitat, color, skill set). **Identifying the Odd One Out:** Present a group of items where one does not belong and have students explain why it is different from the others. **Missing Item:** Give a set of items with a pattern and have students determine the missing item that fits the pattern.

		e) Blood Relation Based Puzzle Inequality	*(https://ssc.nic.in/SSCFileServer/PortalManagement/UploadedFiles/notice_CGLE_03042023.pdf) pg. 20-22* *4. Intelligence Bureau ACIO (https://www.pw.live/exams/wp-content/uploads/2023/11/IB-ACIO-Recruitment-2023-Notification-Emp-News.pdf)* *State Level Exams:* *1. Civil Services Executive Exam (WBCS) (https://wbpsc.gov.in/Download?param1=20230225142430_Syllabus.pdf&param2=advertisement), pg 1* *2. Miscellaneous Services Recruitment Examination (file:///C:/Users/UEMK/Downloads/2707970_2019.pdf) pg1*		**2. Sequential Based Puzzles:** • **Logical Sequencing:** Present a series of events or actions and have students arrange them in a logical order. • **Number Series:** Give a series of numbers with a pattern and ask students to find the missing number or continue the series. • **Letter Series:** Provide a series of letters with a pattern and have students determine the missing letter or continue the series. **3. Selection Based Puzzles:** • **Team Selection:** Provide a set of candidates with different skills and have students select the best team for a specific task. • **Item Selection:** Give a list of items with different attributes and ask students to choose the most suitable item for a given purpose. • **Eligibility Criteria:** Present a set of rules or conditions and have students determine which candidates are eligible or ineligible based on those criteria. **4. Ranking Based Puzzles:** • **Height/Weight Arrangement:** Arrange a group of people in ascending or descending order based on their height or weight. • **Marks/Scores:** Order students or players based on their marks, scores, or performance in a competition. • **Preferences:** Determine the order of

<table>
<tr><td colspan="6">

preference for a group of people based on their likes and dislikes.

5. Blood Relation Based Puzzles:

- **Family Tree:** Present a family tree with missing information and have students deduce the relationships between different members.
- **Coded Relationships:** Use codes or symbols to represent relationships and ask students to decode them.

6. Puzzles with Statements: Give a set of statements about the relationships between people and have students draw afamily tree or answer questions based onthose statements

7. Inequality Puzzles:
- **Coded form of Inequalities**
- **Either-Or Case**
- **Neither -Nor Case**
     Single Statement Inequalities.

University of Engineering and Management

Institute of Engineering & Management, New Town Campus

University of Engineering & Management, Jaipur

4th Semester Syllabus for MCA Admission Batch 2023

Subject Name: Distributed Database Management   **Credit: 03**

Subject Code: MCA401A   **Lecture Hours: 40 Hrs.**

Name of the Course: Distributed Database Management	
Course Code: MCA401A	Semester:
Duration: 40 hours	Maximum Marks: 100
Teaching Scheme	Examination Scheme
Theory: 3	End Semester Exam: 100
Tutorial: 1	Continuous Assessment: 100
Credit: 3	

Aim:	
Sl. No.	
1	Develop a deep understanding of distributed database architecture and design principles.
2	Equip students with skills for optimizing distributed query processing and managing transactions.
3	Enable application of data warehousing, OLAP, and data mining techniques for real-world problem-solving.

Objective:	
Sl. No.	
1	Understand the architecture and design of distributed database systems.

2	Apply techniques for distributed query processing and optimization.
3	Master the concepts of distributed transaction processing and data warehousing.
4	Utilize data mining methods such as association analysis, classification, and clustering.
Pre-Requisite:	
Sl. No.	
1.	Fundamentals of Database Management Systems, Basic Knowledge of Computer Networks, Programming Skills & Operating systems
Course Outcome:	
1.	Understand and explain the architecture and design principles of distributed database systems.
2.	Apply methods and techniques for distributed query processing and optimization.
3.	Understand the concepts of distributed transaction processing, data warehousing, and OLAP technology.
4.	Apply methods and techniques for data association analysis, classification, and clustering.

Module number	Topic	Sub-topics	Mapping with Industry and International Academia	Lecture Hours
1	**Introduction to Distributed Database Management System**	Distributed DBMS features and needs. Reference architecture. Levels of distribution transparency, and replication. Distributed database design – fragmentation, allocation criteria. Storage mechanisms. Translation of global queries. / Global query optimization. Query execution and access plan. Concurrency control – 2 phases locks. Distributed deadlocks. Time-based and quorum-based protocols. Comparison. Reliability- non-blocking commitment protocols.	https://online.stanford.edu/courses/cs244b-distributed-systems	12
2	**Partitioned Networks**	Partitioned networks. Checkpoints and cold starts. Management of distributed transactions- 2-phase unit protocols. Architectural aspects. Node and link failure recoveries.	https://online.stanford.edu/courses/cs244b-distributed-systems	8
3	**Distributed Database Administration**	Distributed data dictionary management. Distributed database administration. Heterogeneous databases-federated database, reference architecture, loosely and tightly coupled. Alternative architecture. Development tasks, Operation- global task management. Client-server databases- SQL server, open database connectivity. Constructing an application.	https://online.stanford.edu/courses/cs244b-distributed-systems	10

Name of the Course: **Image Processing**	
Course Code: MCA401B	Semester:
Duration: 32 hours	Maximum Marks: 100
Teaching Scheme	Examination Scheme
Theory: 3	End Semester Exam: 100
Tutorial: 1	Continuous Assessment: 100
Credit: 3	
Aim:	
Sl. No.	
1	Equip students with a solid understanding of the core principles and techniques used in image processing.
2	Enable students to apply image processing methods to analyze, enhance, and manipulate digital images for various applications.
3	Prepare students to solve complex real-world problems related to image analysis, computer vision, and pattern recognition.

Objective:	
Sl. No.	
1	Understand the fundamental principles and techniques of image processing.
2	Apply methods to enhance and manipulate digital images.
3	Develop skills in image analysis and computer vision.
4	Solve real-world problems using image processing techniques.
Pre-Requisite:	
Sl. No.	
1.	Fundamentals of Database Management Systems, Basic Knowledge of Computer Networks, Programming Skills & Operating systems
Course Outcome:	
1.	To study the image fundamentals and mathematical transforms necessary for image processing.
2.	To study the image enhancement techniques
3.	To study image restoration procedures
4.	To study the image compression procedures

Subject Name: Parallel Programming   **Credit: 03**

Subject Code: MCA401C   **Lecture Hours: 36 Hrs.**

Name of the Course: Parallel Programming	
Course Code: MCA401C	Semester:
Duration: 40 hours	Maximum Marks: 100
Teaching Scheme	Examination Scheme
Theory: 3	End Semester Exam: 100
Tutorial: 1	Continuous Assessment: 100
Credit: 3	
Aim:	
Sl. No.	
1	Equip students to write efficient parallel programs for faster computation.
2	Prepare students for industry applications in high-performance and big-data computing.
3	Foster critical thinking and innovation in solving computational challenges with parallel techniques.

Objective:	
Sl. No.	
1	Understand the fundamentals of parallel computing architectures and models.
2	Develop skills to design, implement, and debug parallel algorithms.
3	Gain proficiency in using parallel programming languages and tools.
4	Analyze the performance and scalability of parallel applications.
Pre-Requisite:	
Sl. No.	
1.	Basic knowledge of programming, data structures, and algorithms.
Course Outcome:	
1.	Understand the evolution of High-Performance Computing (HPC) with respect to lawsand the contemporary notion that involves mobility for data, hardware devices and software agents
2.	Understand, appreciate and apply parallel and distributed algorithms in Problem Solving.
3.	Evaluate the impact of network topology on parallel/distributed algorithm formulationsand traffic their performance.
4.	Gain hands-on experience with agent-based and Internet-based parallel and distributed programming techniques.

1	**Fundamentals of Parallel Programming**	Processes and processors. Shared memory. Fork. Join constructs. Basic parallel programming techniques- loop splitting, spin locks, contention barriers and row conditions. Variations in splitting, self and indirect scheduling.	https://web.stanford.edu/class/cs315b/	12
2	**Data Dependency and Scheduling Techniques**	Data dependency-forward and backward block scheduling. Linear recurrence relations. Backward dependency.	https://web.stanford.edu/class/cs315b/	12
3	**Advanced Performance Tuning and Parallel Programming Techniques**	Performance tuning overhead with a number of processes, effective use of cache. Parallel programming examples: Average, mean squared deviation, curve fitting, numerical integration, travelling salesman problem, Gaussian elimination. Discrete event time simulation. Parallel Programming Constructs in HPF, FORTRAN 95. Parallel programming under Unix.	https://web.stanford.edu/class/cs315b/	12

Syllabus for MCA Admission Batch 2023, 4th Semester

Subject Name: Cloud Computing   **Credit: 03**

Subject Code: MCA401D   **Lecture Hours: 40 Hrs.**

Name of the Course: Cloud Computing	
Course Code: MCA401D	**Semester:**
Duration: 40 hours	**Maximum Marks: 100**
Teaching Scheme	**Examination Scheme**
Theory: 3	End Semester Exam: 100
Tutorial: 1	Continuous Assessment: 100
Credit: 3	
Aim:	
Sl. No.	
1	Analyze the Evolution and Impact of Cloud Computing
2	Evaluate Cloud Computing Service Models and Deployment Strategies
3	Investigate Security Challenges and Solutions in Cloud Computing
Objective:	
Sl. No.	
1	To understand the fundamental concepts of cloud computing.

2	To explore different cloud service models and cloud deployment models.
3	To gain practical knowledge on cloud storage, virtualization, and cloud security.
4	To comprehend the economic, organizational, and technological aspects of cloud computing and development of applications leveraging cloud-based services and APIs.

Pre-Requisite:

Sl. No.	
1.	Basic understanding of computer networks, operating systems, and internet technologies.

Course Outcome:

1.	Understand and explain the key concepts and principles of cloud computing, including its architecture, components, and models.
2.	Differentiate between various cloud service models (IaaS, PaaS, SaaS) and deployment models (public, private, hybrid, community), and assess their suitability for different scenarios.
3.	Apply virtualization techniques and cloud storage solutions to design and manage scalable and efficient cloud-based systems.
4.	Analyse cloud security mechanisms and issues, and implement strategies to safeguard data and applications in the cloud environment.

Subject Name: Compiler Design   **Credit: 03**

Subject Code: MCA402A   **Lecture Hours: 40 Hrs.**

Name of the Course: **Compiler Design**	
CourseCode:MCA402A	**Semester:**4th
Duration: 40Hrs.	**MaximumMarks:100**
Teaching Scheme	**Examination Scheme**
Theory:3	EndSemesterExam:100
Tutorial: 1	ContinuousAssessment:100
Practical:0	PracticalSessionalinternalcontinuousevaluation:0
Credit:3+0	PracticalSessionalexternalexamination:0
Aim:	
Sl.No.	
1	To gain Knowledge of Various aspects of a Compiler.
2	To enhance Ability to identify qualities of a good solution of NFA, DFA etc.
3	To implement NFA to DFA conversion techniques and different parsing methods to solve problems.

Objective:	
Sl.No.	
1	Provide you with the knowledge and expertise to become a proficient compiler design.
2	Demonstrate an understanding of parsing and polishing expression concepts that are vital for compiler design.
3	To produce DFA from an NFA to understand a basic compiler.
4	Critically evaluate NFA based on their design and create DFA from that.
Pre-Requisite:	
Sl.No.	
1.	Proficiency in data structure, graph theory, automata theory and C programming.

Course Outcome:

1.	Understand fundamentals of compiler and identify the relationships among different phases of the compiler.
2.	Understand the application of finite state machines, recursive descent, production rules, parsing, and language semantics.
3.	Analyze & implement required module, which may include front-end, back-end, and a small set of middle-end optimizations.
4.	Use modern tools and technologies for designing new compiler.

Subject Name: Mobile Computing   **Credit: 03**

Subject Code: MCA402B   **Lecture Hours: 40 Hrs.**

Name of the Course: Mobile Computing	
Course Code: MCA402B	**Semester:**
Duration: 40	**Maximum Marks: 100**
Teaching Scheme	**Examination Scheme**
Theory: 3	End Semester Exam: 100
Tutorial: 1	Continuous Assessment: 100
Credit: 3	
Aim:	
Sl. No.	
1	To understand the fundamental concepts and technologies driving mobile computing
2	To understand Mobile Networking and Connectivity
3	To address challenges in mobile security and optimization

Objective:	
Sl. No.	
1	Gain a foundational understanding of mobile communication systems, including cellular networks and their evolution.
2	Grasp the core concepts of mobile networking protocols, covering aspects like network layers and routing in unique mobile environments.
3	Explore the various mobile communication technologies and protocols.
4	Develop critical knowledge of security challenges and solutions for mobile computing devices and applications.
Pre-Requisite:	
Sl. No.	
1.	Knowledge of computer fundamentals and networking concepts.
Course Outcome:	
1.	Define mobile technologies in terms of hardware, software, and communications.
2.	Utilize mobile computing nomenclature to describe and analyze existing mobile computing frameworks and architectures.
3.	Evaluate the effectiveness of different mobile computing frameworks.
4.	Describe how mobile technology functions to enable other computing technologies.

Duration: 40 Hrs.	**Maximum Marks: 100**
Teaching Scheme	**Examination Scheme**
Theory: 1	End Semester Exam: 100
Tutorial: 1	Continuous Assessment: 100
Credit: 1	
Aim:	

Sl. No.	
1	To gain knowledge of various aspects general ethics and energy in life.
2	To get ability to identify relations among technology, engineering and human aspects
3	To implement values in various aspects of life with morality.

Objective:	
Sl. No.	
1	An ability to analyze a problem, then identify and formulate the computing requirements appropriate to its solution
2	Development of Solutions- An ability to design, implement and evaluate a Computer based problems with appropriate consideration for public health and safety, cultural, societal and environmental considerations.
3	Conduct investigations of complex problem – An ability to design and conduct experiments, as well as to analyze and interpret data to reach valid conclusions.
Pre-Requisite:	
Sl. No.	
1.	Knowledge in General Studies, Fundamentals of Computers, Proficiency in Communication Skills.
Course Outcome:	
1.	Understanding the importance and role of science, technology and engineering as knowledge and social-professional world, know the technological growth
2.	To realize the importance of energy as resource and crisis in energy, understand the effect of degradation and pollution of environment, introduce eco-friendly technology.
3.	To choose the appropriate technology for development, understand the transfer, assessment and impact of technology, learn the role of human resource in engineering , man-machine interaction, impact of automation, introduce human-centric technology..
4.	To determine the relation between profession and human values like value crisis in society, life, personality and mental health. know the role/importance of values in law, justice in Indian perspective, know the aesthetic values, learning the relation between morality and ethics and virtue ethics.

Subject Name: Management and Accounting   **Credit: 03**

Subject Code: MCA405   **Lecture Hours: 21 Hrs.**

Name of the Course: Management and Accounting	
Course Code: MCA405	**Semester:**
Duration: 21	**Maximum Marks: 100**
Teaching Scheme	**Examination Scheme**
Theory: 2	End Semester Exam: 100
Tutorial:	Continuous Assessment: 100
Credit: 2	
Aim:	

Sl. No.	
1	To gain Knowledge of basic aspects of Management
2	To enhance Ability to identify qualities of a good Management Control and Strategy
3	To implement learned Concept of Financial and Cost Accounting to solve problems

Objective:	
Sl. No.	
1	The fundamental in basic in Management
2	Basic concepts in the Management control and strategy
3	Principles of Financial Accounting
4	Significance of Cost Accounting in the Accounting field
Pre-Requisite:	
Sl. No.	
1.	Proficiency in Basic of Management and Accounting
Course Outcome:	
1.	On completion of this course students are expected to learn various Concept of Planning, scheduling, organizing, staffing, directing, controlling Managerial economics
2.	On completion of this course students are expected to design Management Control system.
3.	On completion of this course students are expected to do a comparative analysis among different Financial statement and Financial accounting used in a given scenario.
4.	On completion of this course students are expected to acquire adequate knowledge and skills to solve a real-life Cost Volume Profit analysis and budgeting
